cocoTherapy™

* island love for your pampered pet

CocoTherapy® Organic Virgin Coconut Oil

CocoTherapy Organic Virgin Coconut Oil is made from the freshest organically grown coconuts from our USDA certified organic coconut farm. It is guaranteed human-grade, 100% pure and natural:

- non-GMO (genetically modified organism) cold
- pressed
- hexane-free
- unrefined
- raw
- non-bleached
- NO trans fat
- NO hydrogenated fat

Health Benefits of Organic Virgin Coconut Oil and Organic Coconut Chips

Virgin coconut oil is comprised mainly of a Medium Chain Fatty Acid (MCFA), called Lauric acid. Lauric acid is responsible for many of the health benefits of coconut oil. The only other abundant source of Lauric acid found in nature is in human breast milk. The MCFAs in coconut oil are similar to fats in mother's milk and have similar nutraceutical effects. Overall benefits are:

- reduces allergic reactions & supports skin and coat health
- supports healthy immune system and immune response to foreign microbes supports healthy thyroid function and metabolic function for optimum weight levels supports gastrointestinal and digestive health
- provides anti-oxidant protection to support healthy cells and cellular function provides easily digested source of energy

The CocoTherapy® Difference: Superior to other Coconut Products in the Market Today

There are over 120 varieties of coconut and over a dozen ways to produce coconut oil. Not all coconut oils are created equal. CocoTherapy is the highest quality oil available:

- **Highest percentage of Medium Chain Fatty Acids (MCFAs) and Lauric Acid content.** Our coconut oil contains a minimum of 53.28% Lauric Acid content from organic, non-GMO and non-hybrid coconuts, Our coconut oil also contains high percentage of beneficial Medium Chain Fatty Acids (lauric acid, caprylic acid, and capric acid), containing at least 64%.
- **Lowest moisture content.** Our coconut oil has a moisture content of only 0.2%, which is considered "excellent" in purity standards. Lower moisture content means more stable oil, and less susceptible to oxidation, bacteria, and the breakdown of triglycerides into free fatty acid and glycerol. Samples of CocoTherapy® Coconut Oil have not shown any signs of rancidity, even after 3 years.

- Made in our family-owned USDA organic inspected coconut farm and manufacturing facility. We grow and harvest our own coconuts in a family-owned USDA-organic certified coconut plantation. A majority of coconut oil manufacturers (other brands) do not own coconut farms, and often buy their oils from private label sources that purchase their coconuts from a number of small independent farmers, often buying from multiple farmers who may or may not be USDA organic inspected farms.
- **Our manufacturing facility is dedicated only to coconut production.** Our manufacturing plant makes coconut products only. Our facility never processes or use dairy, fish, peanuts, shellfish, soy, tree nuts, and wheat. These products are considered high-allergen foods which may not be desirable in pet foods or good for highly allergic pets.
- **Exceeds industry standards in coconut manufacturing safety process.** We take extra steps in our manufacturing process to ensure the purest and safest coconut oil for the safety of your pets where every batch undergoes independent laboratory testing. Not only do we follow the strictest standards in coconut oil production, but every batch of coconut oil is assigned a LOT number and batch samples are sent to an independent lab to be tested for pathogens and contaminants before packaging. We then catalogue and keep multiple batch samples of oil produced in our plant for NO LESS than five (5) years and test for rancidity and purity.
- Certified USDA organic by the Global Organic Alliance, Inc., a USDA accredited certifying agent. Non-GMO Project Verified

CocoTherapy products are carried by more holistic and conventional veterinarians than any other coconut oil brand. **CocoTherapy® KNOWS coconuts. You can see, smell, and taste the difference!**

Packaging: Resealable pouch containing 12 x 10 ml Organic Virgin Coconut Oil portable foil packets (120 ml total)

Coconut oil

I love this coconut oil for myself and my dog. It tastes the best out of any other coconut oil. I put it in my dogs meal and in my smoothies. I also use it on my face at night and it really leaves my skin feeling soft. It is a wonderful product all around.

Amazing product!

I absolutely love my coconut oil and so do my cats! It's the real deal. The smell, the color and the taste is so real, just like a coconut! It doesn't even compare to the store bought coconut oil! I'll continue to buy from cocotherapy!

CocoTherapy Coconut Oil

This is the best coconut oil I have found. It's got a wonderful flavor and I love that it's not processed in such a way that makes it unhealthy. I put a little on a spoon and let my dogs lick it off. They LOVE it and it's so good for them! Their coats are shiny and beautiful and when they have a hot spot from allergies, coconut oil soothes it right away. Did I mention that I also cook with it? GREAT product!

Awesome Coconut Oil

My Yorkie loves the taste of this coconut oil not to mention the obvious relief she felt when added to the very first hot spot she's ever experienced. Thank you for the superb customer care! Yazmin thanks you for the variety of sample treats. Yum, Yum!

Love it!

I bought CocoTherapy's coconut oil for healthy fats. My cat couldn't wait to try it! He was licking the jar as soon as it arrived. I put a little bit on gauze to rub on his teeth and gums. He goes absolutely crazy for it! He loves his teeth cleaning routine now. As soon as I get the gauze out he goes nuts because he knows he's getting some good coconut oil. Thank you so much for such a high-quality product!

The battle ceases!

My first order arrived just over a week ago so I haven't done much with it yet. But here's what DID happen and I am thrilled. My 22 month old Golden girl suddenly came up with smelly black-gunked ears. I went to my old standby treatment, raw apple cider vinegar flush. Previous dogs didn't love it, but they didn't hate it either, or rather they complied with my treatment request. Brette said NO WAY!!! Even being restrained on a leash she put up a huge battle. I managed to treat the ears twice...and then my coconut oil order arrived. Oh! I melted enough to fill my little medicinal ear syringe twice, and out to the deck we went as I thought it would be messy. It wasn't. No leash and no battle. She immediately tried to lick the syringe while I was trying to fill it, wow! She laid down for me no problem, I reached for an ear, and she put her head down and offered me the ear. I emptied the syringe and then massaged the ear while Brette closed her eyes, almost smiling, and obviously enjoying it. I asked her to flip over, she did without hesitation, and we did the second ear. When we finished she never even tried to nose dive and rub her ears on the floor as she had done after the vinegar. And no "salad" smell, she smelled so nice now! By next day, after only one treatment/cleaning, her ears looked so much better. Now we are both happy! I think next the dogs (2) will be getting some in their dinner since Brette was so determined to taste the oil. Once I get the hang of using this I hope my Golden Girls will consent to sharing some of it with me! Trust me, I will be ordering again.

The best coconut oil around

I LOVE this coconut oil for myself and my dogs. I use this oil in my 4 dogs diets, but I also use it to brush their teeth. It is one of the best products I have found for overall health and wellness. I also like to use this oil for skin issues. My pups love the smell and taste, which makes it even easier to use for a variety of things.

TriPlex™ MCT-3 Oil

Ultra Potency MCT Oil *plus* Lauric Acid

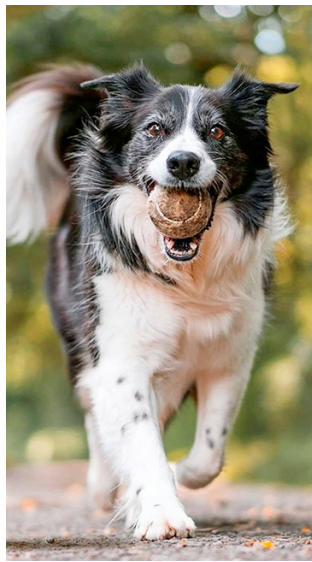

TriPlex™ MCT-3 Oil is a unique blend of medium chain triglycerides (MCT) oil, with higher levels of Caprylic Acid and Capric Acid, *PLUS* Lauric Acid. Unlike other MCT oils, TriPlex MCT-3 is 100% pure and natural, thus retaining the smell and taste of fresh coconut oil. Other brands of MCT oils are refined and deodorized, and do not have the natural smell or taste of coconut. In addition to this, other brands do not contain Lauric Acid. When consumed, MCTs are broken down into individual medium chain fatty acids. Due to its unique properties, MCTs are rapidly absorbed and highly digestible. Most of these medium chain fatty acids (MCFAs) go directly to the liver where they are converted into ketones. Ketones are a high-potency fuel that can cross over the blood-brain barrier and nourish the brain.

TriPlex™ MCT-3 Oil contains the optimal, proprietary blend of Caprylic Acid (C:8), Capric Acid (C:10), and Lauric Acid (C:12); therefore, it has very pronounced therapeutic effects on brain health. The higher levels of Caprylic Acid and Capric Acid convert to ketones raising **blood ketone** levels quickly and efficiently. In addition, Lauric Acid is then converted to ketones at a slower rate, travelling directly to the brain to be converted to ketones by the brain itself, increasing **brain ketone** levels¹.

TriPlex™ MCT-3 Oil is comprised of 93% medium chain triglycerides. The Caprylic and Capric acids raise blood ketones and peak in around 1.5 hours and is completely assimilated in 3 hours. Lauric Acid then increases blood ketones to therapeutic levels and peaks in about 3 hours, and remains elevated for a full 8 hours. For this reason, the unique combination of the three medium chain fatty acids in TriPlex MCT-3 oil provides an immediate boost of energy, as well as provides a longer lasting energy supply.

Because the Caprylic and Capric acids in TriPlex MCT-3 oil is rapidly broken down and used as instant energy, it is highly beneficial for athletic dogs, sporting dogs, show dogs and any dog that needs an immediate energy boost. In addition to the Caprylic and Capric acids, the presence of Lauric Acid further reduces fatigue, and is perfect for older dogs or low-energy dogs that need more prolonged energy.

Medium Chain Triglycerides	93%
Caprylic Acid (C8:0)	7000 mg
Capric Acid (C10:0)	4700 mg
Lauric Acid (C12:0)	1500 mg

TRIPLEX[®] MCT-3 OIL

Perfect for:

- 🐾 Athletic pets
- 🐾 Senior pets
- 🐾 Yeasty pets
- 🐾 Convalescent pets
- 🐾 Low-energy pets
- 🐾 Over-weight pets
- 🐾 Pets with fat intolerance
- 🐾 Pets with digestive disorders

TriPlex™ MCT-3 Oil has a whopping 7000 mgs of Caprylic Acid, giving it powerful antifungal properties. It protects against yeast overgrowth, prevents and treats yeast infections, kills candida yeast cells (gut and skin), providing added digestive support and skin health.

TriPlex™ MCT-3 Oil is highly stable and resists oxidation to protect cells from damaging free radicals.

BENEFITS:

- Rapidly absorbed for energy
- Supports healthy brain function
- Supports healthy immune response
- Promotes healthy yeast/candida management

PERFECT FOR:

- Athletic pets
- Senior pets
- Cognitive support
- Yeasty pets
- Convalescent pets
- Low-energy pets
- Over-weight pets
- Pets with fat intolerance
- Pets with digestive issues

TriPlex™ MCT-3 Oil:

- ✓ Made from our cold-pressed organic coconut oil
- ✓ No palm oil or palm kernel oil
- ✓ Not refined and deodorized
- ✓ No chemicals, hexane, or high heat used in processing
- ✓ Non-GMO
- ✓ No Trans Fats
- ✓ No Cholesterol

M Verified Marilyn H.S.

Great supplement for seniors

My dogs are 10 and almost 14. I see a difference in the way they walk and how shiny their white coats are. I also use other coconut therapy products and am very satisfied with results!

D Verified Donna

Awesome MCT Oil

We are very happy with the MCT oil. Our dogs and cats love it. We also use it in our morning coffee. We have used CocoTherapy coconut oil for a while.

T Verified Thomas M.

Triplex MCT-3 Oil

My dogs seem to not even notice this in their food. They can be fussy at times, especially with new additions. I use coconut oil myself and was pleased to find this company from Dr. Becker's website. All good things from using this product they say. Time will tell but I/We are satisfied with this and the sprinkles. Thanks

CocoTherapy® Organic Coconut Chips

CocoTherapy® Organic Coconut Chips. A delicious treat for your dog or cat, CocoTherapy® Organic Coconut Chips are made from dehydrated organic coconut meat. The dried coconut flakes are made of pure, 100% organic coconut meat, with absolutely NO sugars, salt, preservatives, or chemicals added.

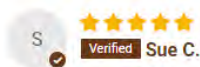

Our organic coconut chips are raw and dehydrated slowly at a low temperature, 98.6° F (37° C). This keeps the nutrients intact, resulting in a raw coconut that tastes fresh, has a wonderful texture, and contains all the rich nutrients found in fresh coconuts.

Benefits of Coconut Chips:

- Rich source of dietary fiber
- Supports digestive and intestinal health
- Supports healthy weight management

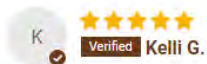

Net Weight: 6 oz / 170 g (resealable pouch)

Note: The contents are vacuum sealed for freshness; therefore, the chips may feel compact when unopened.

My dogs love it

I sprinkle it on top of their food and they gobble it up. Great addition to their diet!

Love The Coconut Chips!

We have used the CocoTherapy chips for several years. Our dogs have beautiful, shiny coats and are healthy and happy. Our veterinarian is always so impressed with their general overall great health. Thank you for a great product!

Yummy and great source of fiber!

One of my yorkies eats a premade raw diet has always needed a little extra "help" when it comes to fiber consumption. We mix in some of these coconut chips with a little warm water in her evening meal, and she happily woofs it down. Better yet - no more straining!

CAT HAIRBALL PLUS™

Natural Hairball Support

100% Organic Coconut

CocoTherapy CAT HAIRBALL PLUS™ is made with only one ingredient, high-fiber organic coconut. It contains NO artificial ingredients, preservatives, and fillers, so you can feel good giving it to your kittens and cats -- even those with sensitive stomachs or food allergies! Coconut fiber passes through the intestines and has a much greater impact on intestinal transit time. It increases stool bulk to help waste pass through more efficiently.

CocoTherapy Hairball Plus is different from other coconut products: Unlike other coconut products which will not break down in water, CocoTherapy Hairball Plus breaks down easily in moisture, feeding friendly gut bacteria, thereby producing Short-Chain Fatty Acids that are necessary for optimum gut health.

WHY COCONUT FIBER

Our coconut fiber is rich in fiber: 93% insoluble fiber and 7% soluble fiber. Not only is it beneficial for managing hairballs; it also benefits your cat in several ways:

- ☑ Helps your cat pass hairballs more easily by adding moisture and bulk to his/her stool
- ☑ Does NOT contain phytic acid, which depletes your cat of vitamins and minerals; unlike psyllium and grain-based fibers often used in other hairball formulas
- ☑ Contains Medium Chain Fatty Acids (MCFA) to support healthy immune response

CAT HAIRBALL PLUS™ is:

- ☑ Raw & vegan
- ☑ Grain & gluten free
- ☑ Dairy free
- ☑ No Trans Fat
- ☑ No preservatives, colors, salt, or sugar
- ☑ No sulfites
- ☑ No mineral oil and petroleum

- ☑ Supports healthy skin and coat. This means less shedding.
- ☑ Supports digestive health and gastrointestinal tract function
- ☑ Supports healthy weight
- ☑ Safe for kittens and pregnant cats
- ☑ Safe for long-term use

- ☑ Breaks down easily in water (unlike other dehydrated coconut products)
- ☑ 100% Human-grade
- ☑ 100% USDA certified organic
- ☑ Non-GMO

TIPS TO MINIMIZE HAIRBALLS

There are other ways to help prevent hairballs in your cat:

- Provide clean, fresh water. This is important when adding fiber to his diet.
- Brush your cat daily to remove loose hairs that cause hairballs.
- Exercise and play with your cat daily.
- If your cat has large amounts of hairballs, try giving **CocoTherapy Organic Virgin Coconut Oil™** in addition to CocoTherapy Hairball Plus.

HOW TO GIVE: Give 1-2 tsp per 10 lb body weight, dividing amount over AM and PM meals daily (.83 grams of fiber in 1 tsp or 1.67 grams of fiber in 2 tsp). Mix with food. If you prefer, you can add water, which will break down the dehydrated coconut.

Guaranteed Analysis: Crude Protein (min) 16%, Crude Fat (min) 15%, Crude Fiber (max) 13%, Moisture (max) 8%.

Packaging: Available in 7 oz/198g resealable foil pouch. 1 Pouch has approximately 50 - 1 teaspoon servings

My cat seems to enjoy this

My cat seems to enjoy these coconut sprinkles. I mix it with his wet food because cats are such picky eaters and he eats it right up with the food. I have noticed it has cut down on his hairball throwing up issue. I will keep ordering this for him.

Hair ball remedy

First of all this product smells incredible. But most importantly, my 2 indoor cats went crazy for it! Excellent source of a MCFAs plus the fiber to aid in hair ball removal. Great stuff!

No hairballs, just boosting health!

My cat has numerous health issues and must have limited ingredient food items, which are very difficult to find! Although hairballs are not an issue for her, I am always looking for ways to be proactive and boost her general health and gut health. She is eating her wet food no problem with the Hairball Plus mixed in – sometimes she likes to see me sprinkle a little on top before she will eat her food. Thank you for a great product!

Holistic DVM, Dr. Vivan Grant Approved!

MAGGIE'S MACAROONS™

Organic Gourmet Treats for Dogs

Made with organic coconut & organic coconut oil

MAGGIE'S MACAROONS™ is a quality nutritional treat that actually tastes great. We use only the purest organic ingredients that are nutrient dense and minimally processed. **MAGGIE'S MACAROONS™** are not baked; they are slowly dehydrated at low temperatures, so the health benefits of coconut and coconut oil are preserved. The result is a **raw treat** that has retained the health-boosting properties of medium chain triglycerides from coconut and coconut oil.

What's more, **MAGGIE'S MACAROONS™** taste and smell divine! These delectable coconut treats are made using 100% organic ingredients that are healthy *and* delicious. We don't use eggs, dairy, grains or preservatives, so dogs with sensitive tummies or allergies can enjoy them too. A truly decadent treat that is *really* good and healthy for your dog! ♥ Dog tested and vet approved!

MAGGIE'S MACAROONS™ are:

- ☑ Raw & vegan
- ☑ Grain & gluten free
- ☑ Dairy free
- ☑ No Eggs
- ☑ No Trans Fat
- ☑ No preservatives, colors, or flavors
- ☑ Low glycemic

Made with the finest ingredients:

- ☑ 100% Human-grade
- ☑ 100% USDA certified organic
- ☑ Non-GMO
- ☑ MADE IN USA

MAGGIE'S MACAROONS™ are a truly beneficial treat:

- ☑ Highest levels of Medium Chain Fatty Acids (MCFAs) than any other treat – because our macaroons are dehydrated and not baked, we retained high levels of MCFAs from the coconut and coconut oil
- ☑ Supports digestive health – coconut fiber has been shown to support digestive health and provide the healthiest form of fiber
- ☑ No animal protein. Excellent for dogs on a limited protein diet or single source protein diet (ie: dogs with kidney, liver issues, or allergies).

- ☑ Supports skin and coat health
- ☑ Supports oral health
- ☑ Supports healthy weight
- ☑ Provides easily digested source of energy

THREE DELICIOUS FLAVORS 4 oz, resealable pouch

Coconut Lemoncello

Ingredients: Organic coconut, organic coconut nectar, organic coconut oil, Organic lemon juice.

Coconut Apple Pie Ingredients:

Organic coconut, organic coconut nectar, organic coconut oil, organic dehydrated apples, organic apple juice.

Coconut Vanilla Flax

Ingredients: Organic coconut, organic coconut nectar, organic coconut oil, organic vanilla extract, organic flax seed.

Very tasty

My dogs love these treats, they are healthy and good for my dogs so I love giving these treats. My dogs love them and eat them up very fast. Great product

Coconut Macaroons

We love these treats because they are nutritious and taste fantastic. The humans in the family eat them too!!

Macaroons are fantastic!

The girls absolutely love the macaroons! All I have to do is pick up the bag and they come running!! I love the great ingredients ... so healthy! Great job CocoTherapy!!

Coco-Carnivore Meatballs™

Organic Coconut MEAT Treats for Dogs and Cats

Made with organic CocoTherapy Coconut Chips

The ultimate freeze-dried, RAW meat treat, Coco-Carnivore Meatballs™ is for the meat lover connoisseur. We wanted to make freeze-dried meat treats that were not only delicious, but super healthy for our pets. This meant that we only use meats that are antibiotic-free, hormone-free, and Non-GMO. We also wanted to make sure the meats were humanely raised and ethically produced, sourced from USA farmers and producers. Then we added the extra health benefits of super-foods from fruits, vegetables, herbs, plus our CocoTherapy Coconut Chips!

Coco-Carnivore™ Meatballs - Raising the bar beyond the common meat treat!

Coco-Carnivore™ Meatballs are:

- ☑ Antibiotic-Free
- ☑ Hormone-Free
- ☑ Grain & gluten Free
- ☑ Raw & freeze -dried
- ☑ No preservatives, colors, or flavors
- ☑ Humanely Raised and Ethically Produced
- ☑ MADE IN USA

Made with the finest ingredients:

- ☑ 100% Human-grade ingredients
- ☑ Made with organic CocoTherapy Coconut Chips
- ☑ No by-products
- ☑ Non-GMO
- ☑ Sourced from USA farmers and producers

THREE DELICIOUS FLAVORS (Net Wt: 2.5 oz (70 g) resealable pouch)

Chicken + Coconut + Basil *Ingredients:* chicken, basil, organic coconut chips

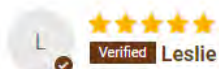

Turkey + Coconut + Spinach *Ingredients:* turkey, spinach, organic coconut chips

Beef + Coconut + Oranges *Ingredients:* beef heart, beef kidney, beef liver, oranges, organic coconut chips

CoCoTherapy Meatballs

My dogs are crazy for them. They prefer them over any other treat they have ever had. Doesn't matter which flavor, they love them all. It's so nice to feed them a treat that they love and is good for them.

Two Thumbs Up

Loved watching my grand-puppy try the beef, orange and coconut for the first time. He was initially curious about it, but once he tasted it he devoured it. Now, whenever he comes over he goes directly to the cupboard they are kept in and sits by it until I give him one. He loves all the flavours equally. We all love that they contain all natural ingredients. A big hit.

Pure Hearts™

Organic Treats for Dogs

Made with organic coconut & organic coconut oil

The cure for the common treat is here! **Pure Hearts™** are made using 100% organic and non-GMO ingredients that are not only good for your furry friend, but ridiculously delicious too! TWO DELICIOUS FLAVORS (5 oz, resealable pouch)

Coconut Blueberry Cobbler

Ingredients: Organic coconut, organic buckwheat flour, organic coconut nectar, organic coconut oil, organic blueberries.

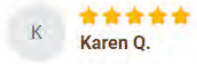

Coconut Pumpkin Pie

Ingredients: Organic coconut, organic buckwheat flour, organic coconut nectar, organic coconut oil, organic pumpkin, organic ginger.

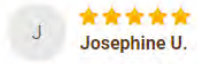

Best treat ever

We have been using this product since hearing recommended by Dr. Judy Morgan. The dogs love it and it's so good for them. Their coats have never been nicer.

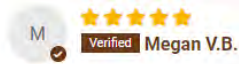

Perfect bite size treat!

The heart shape is just the right size for my little dogs. My pups love both flavors and I love knowing the ingredients are 100% organic. Another fabulous healthy product from Coco Therapy!

Another one that's not just for dogs!

These cookies are so yummy! Bite size and human grade! Love them!!!!

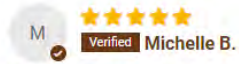

Love these treats!

The coco charms are perfect little treats for my cavaliers! The bag contains several training treats and so these treats last me far longer than many other bags of treats I have purchased. I highly recommend these low-calorie snacks! Both flavor options are wonderful as well!

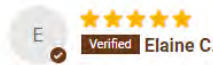

My Girls Love Coco Charms

Coco Charms are a big hit with my standard poodles! One has lots of food sensitivities and these are perfect for her. Love them as a training treat!

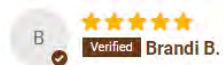

Training treats

We love coco Therapy products and even more importantly my little rescue pup loves them. Thanks for a great product

Coco Charms are a 50/50 hit

One of my Maltese girls love both the blueberry and the pumpkin treats. The other girl will only eat the blueberry treats. Of course she's the one I wanted to give the pumpkin to. 😊

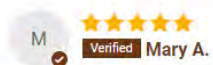

Coco Charms treats

These treats are awesome and they are the perfect size for training! My dogs absolutely love them.

Excellent taste

My diabetic dog loves these treats. I'm so glad there is something he can eat as a reward.

Really good product.

Product is really good. My dogs love the taste.

Coco-Gems™

Organic Training Treats for Dogs

Made with organic coconut & organic coconut oil

Organ Bites!™

Raw, Freeze-Dried Organ Treats for Dogs and Cats
Made with organic CocoTherapy Coconut Chips for GI Health

Organ Bites™ Raw, freeze-dried organ meats - Raising the bar beyond the common meat treat!

CocoTherapy Organ Bites! are raw, freeze-dried treats made with nutrient-rich organ meats. Made of liver, hearts, and gizzards that are antibiotic-free and hormone-free, we use organs from animals that were humanely raised and ethically produced, sourced from USA farmers and producers. Then we added the extra health benefits of super-foods from fruits & vegetables, plus our CocoTherapy Coconut Chips! Coconut Chips provide beneficial fiber to help support animals who have difficulty metabolizing proteins.

Organ Bites!™ are:

- Antibiotic-Free
- Hormone-Free
- Grain & gluten Free
- Raw & freeze -dried
- No preservatives, colors, or flavors
- Humanely Raised and Ethically Produced
- MADE IN USA

Made with the finest ingredients:

- 100% Human-grade ingredients
- Made with organic CocoTherapy Coconut Chips
- No by-products
- Non-GMO
- Sourced from USA farmers and producers

Our Organ Bites! treats are made with antibiotic-free and hormone-free organs from animals that were humanely raised and ethically produced, sourced from USA farmers and producers.

Organs are the most nutrient-dense meats and provide a wealth of benefits:

Heart (Chicken & Pork)

These nutrient-rich organs are a good source of protein, iron, and B vitamins. They're also a great way to get CoQ10, an important nutrient for heart health. In addition, chicken and pork hearts are a good source of taurine, an amino acid that's essential for cardiovascular health.

Liver (Chicken, Pork & Turkey)

Liver is one of the most nutritionally dense foods on the planet. The organ meat is rich in protein, iron, and vitamins A, B, and C. It's also a good source of copper, an important mineral for blood health. Liver is a great way to add nutrients to your pet's diet and support their overall health.

Turkey Gizzards

Turkey gizzards are the stomachs of turkeys. They're a good source of protein, iron, and vitamins B6 and B12. Turkey gizzards are also a natural source of chondroitin and glucosamine, two nutrients that are important for joint health. Turkey is a nutritious, low-fat source of protein that helps pets maintain lean muscle mass. Protein an essential nutrient for all pets and is rich in muscle-building amino acids. It's especially important for growing puppies and kittens, and adult dogs and cats that are active or working hard.

AVAILABLE IN THREE DELICIOUS FLAVORS (Net Wt.: 3 oz (85 g) resealable pouch)
