

# 100% NATURAL ORGANIC NAPURE AUSTRALIAN MADE LATEX MATTRESS

For health, comfort and support we recommend Totem Road 100% Organic Natural Latex Mattress. Made from anti-fungal and anti-bacterial Napure Latex with high quality, fine Australian wool quilting.

## Eco-INSTITUTE® Certification

Certification by the German Eco-INSTITUTE® ensures that our mattresses are made from 100% natural and organic latex. Totem Road mattresses are free of synthetic fillers allied with harmful chemicals such as Pentachlorophenol or Tetrachlorophenol, which can release harmful gassing in the bedroom.

## HealthGuard® Treatment

HealthGuard® Treatment discourages the breeding of dust mites and bed bugs and is great for people who are sensitive to synthetics and dust or are asthmatic and prone to hay fever. This treatment is blended into the mattresses wool quilting, providing additional protection against mould. The technology has been tested and approved by Monash University's Microbiology faculty and carries world wide quality assurance from Oeko-Tex®.

## Comfort and Support

The Totem Road 100% Natural Organic Napure Latex Mattress adjusts to the body's movement, ensuring you remain supported all night. This latex structure also offers minimal partner disturbance. We recommend Totem Road's posture slat system for the best results. However it can also be used with the traditional slat system.

## Ventilation

The open-cell structure allows the mattress to breathe, provides ventilation and helps regulate body temperature. Super fine high quality Australian wool quilting on both sides allows you to spin and flip the mattress. Wool being a naturally breathable fibre complements the open-cell technology.

## AdaptiveFabric® Treatment

Adaptive® Fabric Treatment accelerates the evaporation of moisture. This textile technology responds to changes in temperature and moisture levels, providing a regulated healthy sleeping environment. This treatment also carries world wide quality assurance from Oeko-Tex®.
