# cubelock Safety Restrictor Guide

Cubelock has created this guide to help installers choose the best restrictor to suit each window installation project.

**Homes**

**Premier Window Restrictor**

For the utmost safety in the home, this restrictor uses a secure-key mechanism which will fail locked even when tampered with, unlike other standard restrictors. Available in single or double lock.

Who's at risk?  
Children  
Elderly

Complies with Child Safety function of BS EN 13126-5:2011

**Top Choice**

**Student Accommodation**

**Premier Window Restrictor**

This restrictor will fail locked even if a student attempts to break it. Safety of students' possessions is also guaranteed as the restrictor stays locked even when tampered with from the exterior.

Who's at risk?  
Students

**Top Choice**

**Standard Window Restrictor**

Similar to the Premier Window Restrictor but with a standard key mechanism, this restrictor also uses tamper proof screws and a 20mm adjustable cable.

Complies with Child Safety function of BS EN 13126-5:2011

**Anti-tamper cover**

Pair this secure cover with a budget, non-keyed restrictor. Can be used alone or in conjunction with a standard restrictor to provide greater capability against forced abuse.

**Top Choice**

**High Security**

**Fixed Window Restrictor**

In high-security situations, patients' safety is pivotal at all times.

This product enhances security of the locking mechanism. Pair this with ours and competitors' products.

Who's at risk?  
Patients  
Residents

**Top Choice**

**Fire Escape**

**Thumbturn Window Restrictor**

The Thumbturn restrictor has a quick release mechanism in case of an emergency and complies with windows for escape or rescue.

Who's at risk?  
Occupants

**Top Choice**

The Good Practice Fitting Window Restrictors 2019 Technical Sheet, from Certass Trade Association, provides clear information to installers and explains best practice principles to follow to ascertain whether safety restrictors are required when fitting windows.
