

HOW TO CREATE PERFECT HANGING SLEEVE CORNERS

Created by Mikael Svensson

Hanging sleeve corners is an easy solution to be able to hang your quilt on the wall. When the binding is added, just measure the distance between the edges of the corners, cut a rod with that length and put it under the corner triangles. Make one more to put at the bottom of your quilt to add weight to help make the quilt hang straight.

CATEGORY:

- Quilting

SKILL LEVEL:

- Beginner

MACHINE:

- Sewing machine

MATERIALS:

- Four fabric squares 6x6" (15x15cm) (the size of the squares could be smaller or larger depending on the size of the quilt).

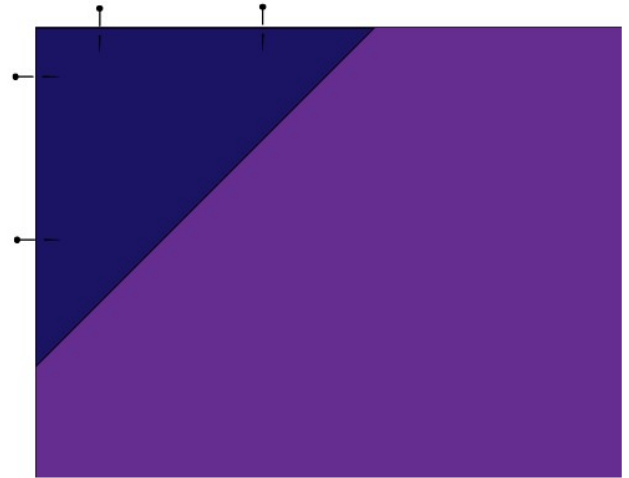

Step 1: Fold the squares diagonally.

Step 2: Pin one square in each corner, raw edges even with the sides of the quilt.

Step 3: Add the binding to the quilt and sew the folded squares in place at the same time.

Tip: If you have an embroidery sewing machine you can use one or more of the corners to stitch out quilt labels on. You can find instructions on how to do this in CREATIVATE.
