

## GAS PRESSURE TEST GAUGES

### MODEL BRGT

#### FEATURES:

The Model BRGT Series from Blue Ribbon Corporation is a combined utility gas pressure test gauge and valve body. Before gas is run into the system, it is charged with air. The gauge then indicates whether or not there is a leak present within the line. The valve body serves strictly as a bleed port. Series units support the reliable, cost-effective testing of gas line pressures within both commercial and residential applications.

#### SPECIFICATIONS:

- Dial Size: 2"
- Measurement Range: 0-15 to 0-100 PSI (1/10# increments - only for 0-15)
- Connection: 3/4" FPT
- Accuracy: 3-2-3%

#### ABOUT BLUE RIBBON CORP:

Founded in 1978, Blue Ribbon Corporation had its origins as a direct distributor of gauges and thermometers to satisfy a growing need among industry OEMs. These OEMs required higher volumes of lower cost instrumentation that could offer necessary value for investment, yet which would never compromise on quality. Since that time, Blue Ribbon has evolved into its own brand of products, with its main manufacturing facility also producing Pressure Transmitters & Level Sensors. Blue Ribbon has also routinely partnered with OEMs and industrial instrumentation manufacturers to custom design gauges, thermometers and accessories to exact industry specifications.
