

TRAINING CONCEPTS – BOILERS/BURNERS

1. THE BOILER

What is a boiler?	PAGE 1
Steam and its early development Fig.1.1	PAGE 2
Boiler capacity ratings	PAGE 3

TYPES OF BOILERS

A. FIRETUBE BOILERS	PAGE 3
Firetube Boiler Design Fig. 1.3	PAGE 6
Firetubes – Wetback & Dryback	PAGE 5
Wetback & Dryback Styles Fig. 1.4	PAGE 6
Typical Firetube Boilers Fig. 1.5	PAGE 7
Firetube Boilers 4-Pass & 3-Pass Design Fig. 1.6	PAGE 8
B. WATERTUBE BOILERS	PAGE 9
Watertube Boiler Styles Fig. 1.7	PAGE 10
Watertube Boiler Design Fig. 1.8	PAGE 11
Typical Watertube Boiler Arrangements Fig. 1.9	PAGE 13
Standard D-Style Watertube Boiler Arrangement Fig.	PAGE 14

2. WATERSIDE (BOILER)

A. Blowdown – Why do we blowdown a boiler?	PAGE 16
Water quality – Impurities in water	PAGE 16
What are these impurities and what do they mean?	PAGE 18
Bottom blowdown	PAGE 21
Bottom blowdown Fig.2.1	PAGE 22
Continuous Blowdown	PAGE 23
Blowdown Procedure	PAGE 23
Bottom & Continuous Blowdown Cycle Fig. 2.2	PAGE 24
B. Waterside Care –	
Gaskets – Installation	PAGE 26
Boiler Failures	PAGE 26
C. Safety Valves –	PAGE 27
Boiler Safety Valves Fig. 2.3	PAGE 28
Safety Valve Malfunctions	PAGE 29
Installation	PAGE 32
Operation & Maintenance	PAGE 33

D.	Feedwater Accessories	
	Feedwater Tank Description	PAGE 32
	Deaerating Tank Description	PAGE 32
	Feedwater Tank Description Fig. 2.4	PAGE 35
	Deaerating Equipment – How it works	PAGE 36
	Feedwater Control	PAGE 37
	2-Element Feedwater Control	PAGE 38
	3-Element Feedwater Control	PAGE 40
	2 & 3 Element Description Control	PAGE 39
E.	Low Water Cutoffs	
	Preventing Boiler Failures from low water	PAGE 41
	Probe Type & Fusible Plug Low Water Cutouts	PAGE 42
	Float Type Low Water Cutouts	PAGE 43
	Float Type Low Water Cutout Operation Sequence	PAGE 44
	Testing Low Water Cutouts- Quick & Slow Drain Test	PAGE 46
	Frequency of Low Water Testing	PAGE 47
	Maintenance of Low Water Cutouts	PAGE 47
3.	FIRESIDE (BOILER)	
A.	Refractory – Fireside	
	Refractory maintenance and care	PAGE 49
	Refractory Materials	PAGE 50
	Modes of Heat Transfer	PAGE 51
	Heat Loss Through Pipe & Insulation Table	PAGE 53
	Watertube Refractory Breakdown Description	PAGE 54
4.	FUELS FOR COMBUSTION	
A.	Natural Gas Composition	PAGE 55
	Specific Gravity	PAGE 55
	Specific Gravity Diagram – Natural Gas/Propane	PAGE 57
	Heating Value	PAGE 58
	Steam Basics – Table 2.2	PAGE 59
	Gas Fired Fuel Trains – Regulating Bodies:	
	IRI, FM, UL, ASME	PAGE 60
	Fuel Train Components	PAGE 62
	Typical UL Gas Fuel Train	PAGE 63
	Typical IRI Gas Fuel Train	PAGE 64

B. Fuel Oils	PAGE 65
Fuel Oil Specifications	PAGE 65
Properties Related to Storage Requirements	PAGE 66
Properties Related to Cleanliness & Deposits	PAGE 67
Properties Related to Handling & Combustion	PAGE 68
Oil Fuel Train Components	PAGE 73
Typical Heavy Fuel Oil Train Components	PAGE 74
C. Waste Wood Fuel	PAGE 73
Hog Fuel, Hog Fuel Unit & Moisture Content	PAGE 75
5. IGNITION/PILOT	
A. Pilot Regulator, Pilot Solenoid Valve, Ignition Xfrm	PAGE 76
Minimum Pilot Test	PAGE 77
Typical Mounting Position of Pilot Assemblies	PAGE 78
Mounting of Flame Rods	PAGE 79
Pilot Terms – Intermittent, Continuous, Interrupted	PAGE 80
Relationship of Pilot Flame to Flame Scanner	PAGE 81
6. PROGRAMMERS (FLAME SAFEGUARD)	
A. Types of Programmers	PAGE 83
Sequence of Operation	PAGE 84
Description of Functions for Operating Controls	PAGE 86
Old Style Programmers – Fireye	PAGE 88
New Style Programmers – Fireye	PAGE 89
BC7000 – Honeywell	PAGE 90
7800 – Honeywell	PAGE 91
System Configuration Flame Safeguard – Fireye	PAGE 92
7. FLAME SCANNERS	
A. Flame Rod	PAGE 93
Infra-Red (IR-Lead Sulfide)	PAGE 94
Ultra-Violet (UV) Flame Detector	PAGE 96
Typical Flame Scanners – Honeywell	PAGE 95
B. Flame Detector Principles	PAGE 97
Flame Envelope Characteristics	PAGE 98
Location of Flame Detectors	PAGE 100

8. COMBUSTION

A. What is combustion?	PAGE 101
Controlled Combustion	PAGE 102
Explosive Combustion	PAGE 102
Complete Combustion	PAGE 102
Fuel Classifications	PAGE 103
B. Composition of Fuels	PAGE 104
Vaporization and Ignition	PAGE 104
Stoichiometric Combustion	PAGE 105
Flame Temperature vs. Excess Air Chart	PAGE 106
Burners & Atomization	PAGE 107
Fuel Ignition Temperatures	PAGE 109
Flame Propagation Rates	PAGE 110
C. Flame Characteristics	PAGE 111
Visible Light, Ultra-Violet, Ionization in Flame	PAGE 112
D. Combustion Process	PAGE 113
Efficiency & its meaning	PAGE 113
* Thermal Efficiency	PAGE 113
* Combustion Efficiency	PAGE 113
* Boiler Efficiency	PAGE 113
* Steam to Fuel Efficiency	PAGE 113
E. Adjustment of Burners	PAGE 114
Excess Air vs. CO ₂ & CO vs Excess Air – Chart	PAGE 115
CO ₂ vs Excess Air – Various Fuels – Chart	PAGE 116
Boiler Room Air Supply – Uniform Mechanical Code	PAGE 117
Boiler Room Air Supply – Formula	PAGE 118
F. Furnaces for Waste Wood burning	PAGE 119

9. BOILER/BURNER OPERATION

A. Boiler/Burner Information	PAGE 121
Boiler Room Log Book	PAGE 122
Typical Boiler Room Log Book	PAGE 123
Typical Boiler Room Check List	PAGE 124
Suggested Testing Schedule	PAGE 125

B. Boiler Inspection	PAGE 126
Fireside Inspection	PAGE 126
Waterside Inspection	PAGE 126
Hydrostatic Testing	PAGE 127
Laying Up a Boiler	PAGE 128

10. TROUBLESHOOTING BURNER PROBLEMS

A. Troubleshooting Oil Pumps	PAGE 129
High Vacuum	PAGE 129
Finding Air Leak	PAGE 130
B. Burner Malfunctions	PAGE 132
Pilot Flame Failures	PAGE 134
Operator Troubleshooting	PAGE 135
Main Burner Flame Failures	PAGE 136

11. GLOSSARY	PAGE 137
---------------------	----------

12. REFERENCES	PAGE 164
-----------------------	----------
