Our Colors

We strive to accurately represent our colors in our catalog and on our website, though leather is a 100% natural material and no two hides look alike. The base color of each varies, which can slightly affect the final color of each item. We think that's what makes leather so beautiful and makes every one of our pieces unique: just like natural wood grain, no two pieces will ever look exactly the same.

new New Collection: Metallic

Formally introducing our stunning metallic collection in three exquisite hues: **Black Ice**, **Burnished Metal**, and **Champagne**. Compliment your style with these captivating metallic shades, each one an additional touch of elegance to the item style they comprise.

Black Ice: icy steel flecks over a luxurious obsidian suede.

Burnished Metal: the perfect blend of warm and cool, with rich mahogany undertones peeking through a multi-dimensional speckled silver patina.

Champagne: buttery soft with a neutral sparkle.
