

It's All There

(Genesis 1:1-50:26)

The origin of plants and trees,
Of animals and birds and bees,
And how all things received their life;
And who ordained husband and wife;

The origin of moon and stars,
And why we are the way we are;
The origin of deadly sin;
In Genesis it all begins.

*It's all there
If you'll just take a look.
Yes, it's all there
In God's holy book.
In His holy book.*

A glimpse of God's redemptive plan
To counteract the Fall of Man,
And how the earth was covered up
With water from God's judgment cup;

And why each tribe speaks differently,
And how the nations came to be;
There's records of the origins;
In Genesis it all begins.

(chorus)

The promises to Abraham
That still affect the Holy Land;
How Abraham in God relied
And through His faith was justified;

How history is in God's hands
As He works out His perfect plan;
There's so much more if you dig in;
In Genesis it all begins.

(chorus)
