

# Print-on™

Textured white 300 micron, printable PVC hybrid film, suitable for printing with HP Latex, Eco-Solvent and Solvent based inkjet inks. Suitable for indoor and outdoor use. Synthetic lay-flat anti curl.

## USES:

300mic Print-On™ is typically used to produce roller banners for the exhibition and display industry. It has synthetic 'lay-flat' properties to ensure anti-curl in the roller mechanisms. The media has an anti-scuff textured finish for enhanced durability and light diffusion. It is designed for use without the need for lamination, therefore reducing cost. It can however be combined with our range of monomeric pressure sensitive laminates if preferred for added durability and different finishes.

Print-On™ has a grey backing with light stop properties to minimise light transference making it ideal in the exhibition environment.

### TEXTURED WHITE FINISH / GREY BACK LATEX, SOLVENT & ECO-SOLVENT & UV PRINTABLE

Typical Available Widths	914mm, 1067mm, 1370mm, 1520m
Typical Length	30m / 50m
Compatibility	Eco Solvent Latex Solvent UV

### Product Features and Performance Data

Base Weight (g/m <sup>2</sup> ) (+/- 5%)	410
Caliper (microns) (+/- 15)	300
Gloss @ 60°C (BS3900.D5)	min 4.0 max 8.0
Transmission (%) (Densitometer)	0.52
Whiteness (C.I.E) (ASTME313-98)	102.2

STORAGE: Effort must be made to keep this product free from moisture and excessive exposure to ultra violet radiation before use.
