

RING SIZE GUIDE

This guide is to be used with an existing ring to find out your ring size.
For greatest accuracy use a ring with a similar band width and style to that you want to buy.
Note: We recommend measuring in millimeters (mm) for greatest accuracy.

STEP 1

Print this document out to 100% - ensure that page scaling is set to 'none' on the printing dialogue box. Check the printed size by measuring the line in the top corner.

It should be exactly 5cm.

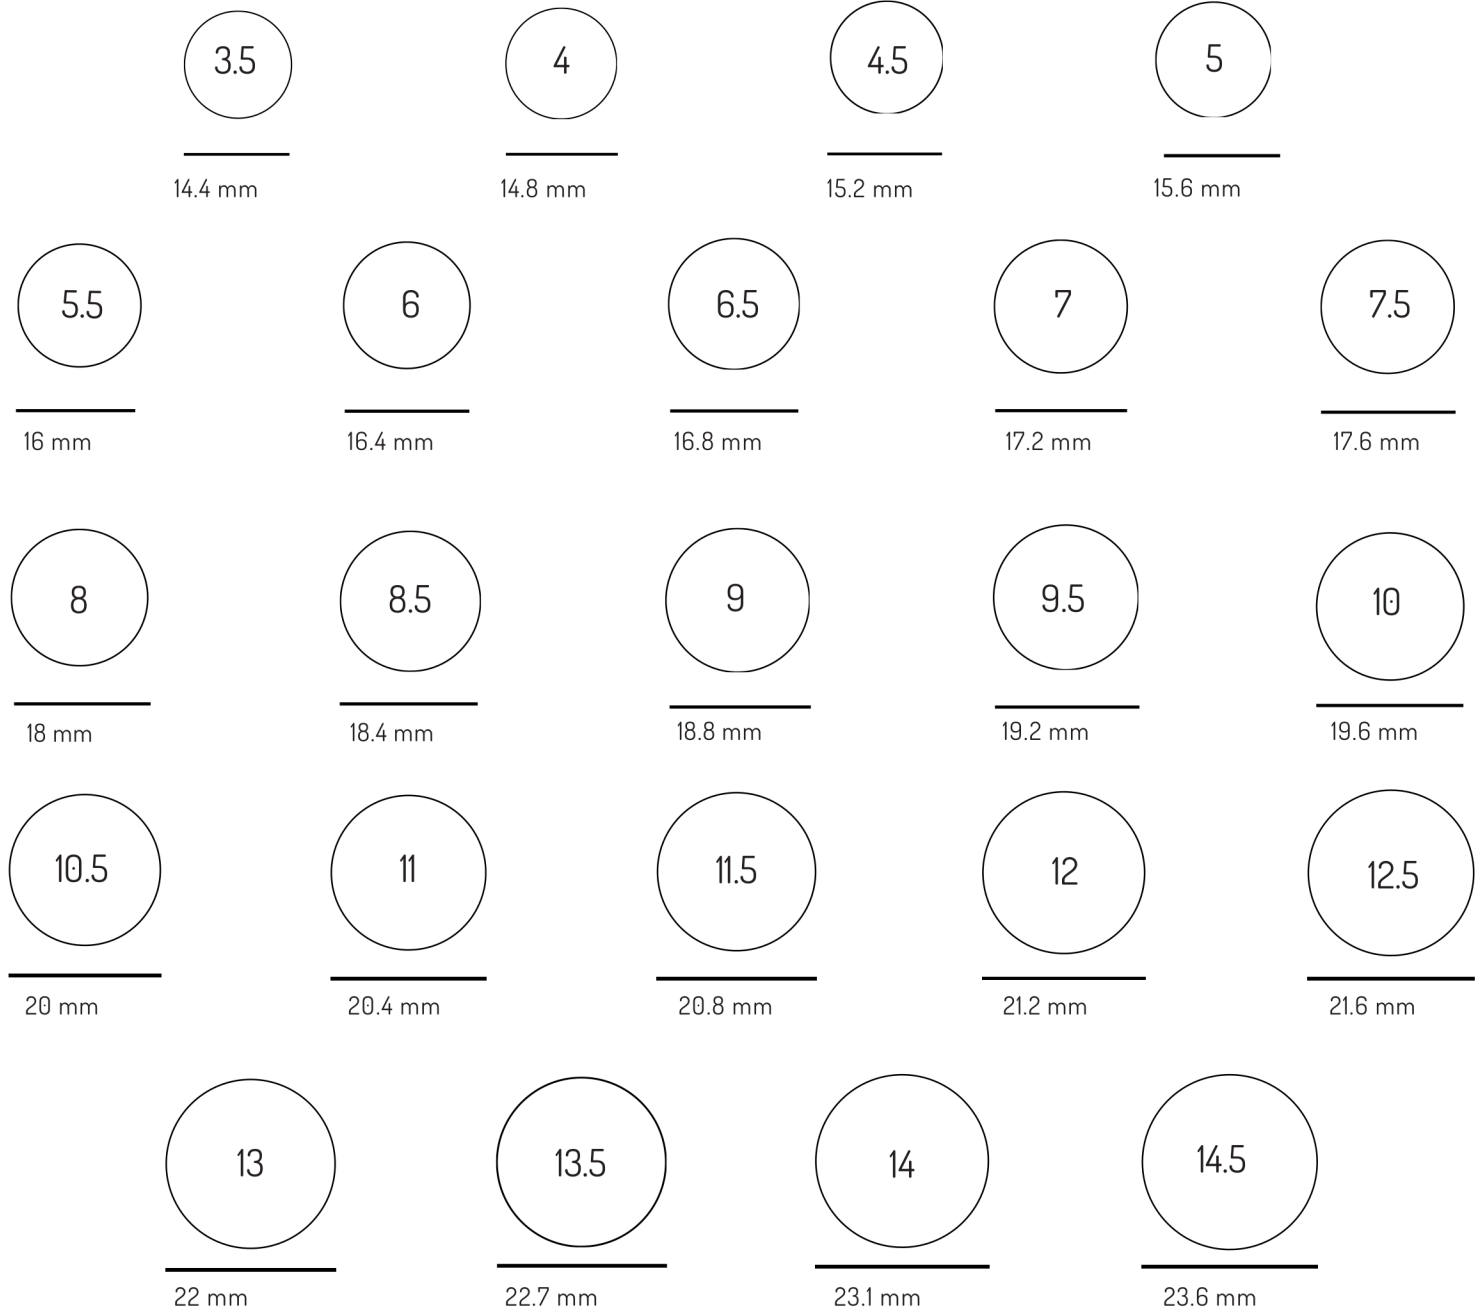

STEP 3

Place your ring on the chart below with the stone facing up, and match the inside edge of the ring to the circle nearest in size.

STEP 3

The number that fits best within the circle, is your ring size.

If the ring falls somewhere between two sizes you should always opt for the larger size.
