

WATER WHEEL BALANCING INSTRUCTIONS

...FOR WHEN WHEEL HAS BEGUN TO SPIN ERRATICALLY

TO BALANCE YOUR WATER WHEEL, SET ON LEVEL GROUND AND LET THE WHEEL STOP AND SETTLE ON IT'S OWN. THE HEAVIEST PART OF THE WHEEL HAS AUTOMATICALLY STOPPED AT THE BOTTOM.

AFTER WHEEL STOPS, GRASP THE TOP OF THE WHEEL AND PULL THE WHEEL DOWN 1/4 TURN AND HOLD.

AT THIS POINT, THE HEAVIEST PART OF THE WHEEL IS NOW PARALLEL WITH PART YOU ARE NOW HOLDING.

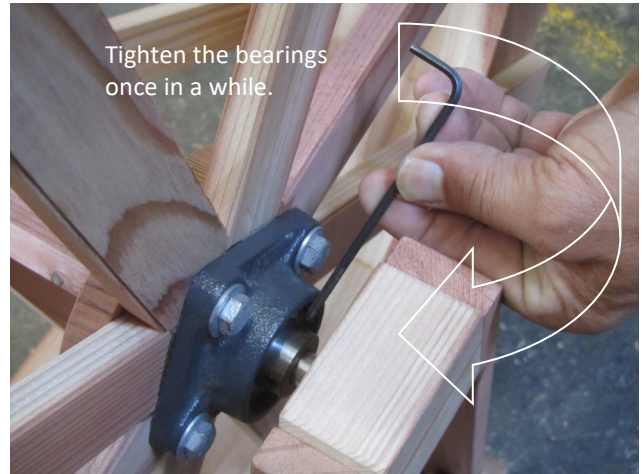

WITH THE WATER CONTAINER PROVIDED, FILL IT WITH THE AMOUNT OF WATER NECESSARY SO WHEN PLACED ON THE HEAVIEST PART, THE WHEEL WILL REST BALANCED ON ITS OWN WITHOUT IT SWINGING BACK DOWN TO IT'S ORIGINAL POSITION. FASTEN THE COUNTER-WEIGHT BACK ON AND THE WHEEL IS NOW BALANCED.

NOTES

- ◇ YOUR WHEEL IS MADE OF PINE and TREATED WITH OIL BASED WOOD PRESERVATIVE.
- ◇ GREASE once in EVERY 6 MONTHS. YOUR WHEEL IS EQUIPPED WITH EXTERIOR, HIGH-QUALITY, THERMOPLASTIC HOUSING, BLACK-OXIDED BEARINGS. THEY SHOULD GIVE YOU MANY YEARS OF TROUBLE-FREE SERVICE IF MAINTAINED PROPERLY.
- ◇ APPROXIMATELY ONCE A YEAR OR MORE, DEPENDING ON AMOUNT OF USE OR SEVERITY OF WEATHER, INJECT GREASE WITH A STANDARD GREASE GUN INTO THE BEARING TO KEEP IT WELL LUBRICATED.
- ◇ We recommend you put a timer with automatic on and off settings in order to prolong a lifespan of your water wheel.
- ◇ **Keep out of reach of children. Add a fence around your water wheel to prevent children from being injured.**

INJECT GREASE HERE...

APPROXIMATELY ONCE A YEAR OR MORE, DEPENDING ON AMOUNT OF USE OR SEVERITY OF WEATHER, INJECT GREASE WITH A STANDARD GREASE GUN INTO THE BEARING TO KEEP IT WELL LUBRICATED.
