How to Play BucketBall (*Quick Start Guide*)

Once the BucketBall court and equipment has been setup properly, game play may start.

Start of Game

- Initial possession is determined by: shoot-off, coin flip, rock-paper-scissors, etc.

Throwing

- Each player on a team throws once, trying to throw the ball into the other team's buckets.
- If a ball goes into a bucket, then the bucket is removed.

Re-Racks

- Teams are allowed one re-rack per game. Here are a few re-rack examples:

End of Game

- As soon as one team eliminates all of the other team's buckets, they WIN!!!
- The losing team gets rebuttals as follows: one throw per player, one throw each with bring backs, each player throws until they miss.
- If the losing team makes all of the buckets, the game goes into overtime. If not, they lose and the game is over.

Overtime

- Three (3) buckets per side in triangle formation are used in overtime and the team that is winning gets to throw first.
- Overtime game play is the same as normal game play and the objective is to eliminate all of the other team's buckets.
