

Monitor desk mounts - single and dual

Get a better monitor viewing experience and enjoy a comfortable workstation. You can easily tilt, pivot and adjust the mounting arm(s) to reduce eye, back and neck strain.

The monitor mounts are easily assembled and are mounted with VESA standard plates. If you change or replace your monitor, you can always find something compatible with the Gearlab monitor mounts.

The cable management on the monitor mounts organizes and routes all cables to give you a clean desk and eliminate hazards associated with loose cabling.
