Storage and Shelf Life

For optimal results, product should be shipped and stored in dry, dark, and cool (between 45 and 75 degrees Fahrenheit) conditions. Temperatures above these thresholds may hasten oil separation.

Cold storage is acceptable, but keep above 45 degrees F to prevent freezing. Freezing may permanently change texture and hasten oil separation. Condensation during and after cold storage may cause moisture damage to product label.

Product shelf-life is 18 months from date of manufacture. Minimum of 9 months of shelf life is guaranteed upon first shipment from our distribution center.
