Storage and Shelf Life

For optimal results, product should be shipped and stored at ambient temperature (between 50 and 80 degrees Fahrenheit). Temperatures above these thresholds may hasten spoilage.

Cold storage is not acceptable, keep above 40 degrees F to prevent freezing, as freezing may permanently change taste & texture. Condensation during and after cold storage may cause moisture damage to product & packaging.

Product shelf-life is 24 months from date of manufacture. Minimum of 12 months shelf life is guaranteed upon first shipment from our distribution center.
