ANTI-MICROBIAL VINYL PROTECTIVE GOWN

This Anti-Microbial Vinyl Protective Gown is designed to fit like a standard non-surgical/isolation gown and may in fact be worn over such a gown. Its generous size provides full coverage and flexibility to the wearer and secures at the waist for a comfortable fit. It also includes long sleeves with thumb-loop wrists. The gown kills bacteria on contact and its waterproof design allows it to be wiped off and worn multiple times.
