

Fabric Care

GENERAL FABRIC CARE

Vacuum or brush with non-metallic stiff bristle brush regularly (at least once a month) to remove dust and grime. Protect from direct sunlight to prevent fading. Know your fabric spot cleaning code and have cleaner on hand so that you can act fast if a spill occurs.

FABRIC CLEANING CODES

S

Spot clean only with a water-free dry-cleaning solvent. Pretest a small, inconspicuous area before proceeding. Do not saturate. DO NOT USE WATER. Pile fabrics may require brushing with a non-metallic, stiff bristle brush to restore appearance. Cushion covers should not be removed and dry cleaned. To prevent overall soiling, frequent vacuuming, or light brushing with a non-metallic, stiff bristle brush to remove dust and grime is recommended. When cleaning a spill, blot immediately to remove spilled material. Evenly clean the entire panel in a seam to seam fashion. Do not clean just the spots or stains. Overall cleaning by a professional furniture cleaning service only is recommended. When an overall soiled condition has been reached and professional care is required, contact an IICRC Certified Firm who specializes in upholstery cleaning.

SW

Spot clean with upholstery shampoo, foam from a mild detergent, or mild dry-cleaning solvent designed for furniture. Pretest a small, inconspicuous area before proceeding. DO NOT SATURATE. Pile fabrics may require brushing with a non-metallic, stiff bristle brush to restore appearance. Hot water extraction or steam cleaning is not a recommended cleaning method. Cushion casings should not be removed and laundered or dry cleaned. To prevent overall soiling, frequent vacuuming, or light brushing with a non-metallic, stiff bristle brush to remove dust and grime is recommended. When cleaning a spill, blot immediately to remove spilled material. Evenly clean the entire panel in a seam to seam fashion. Do not clean just the spots or stains. When an overall soiled condition has been reached and professional care is required, contact an IICRC Certified Firm who specializes in upholstery cleaning.

W

Spot clean only with water-based shampoo or foam upholstery cleaner. Do not use solvents to spot clean. Pretest a small, inconspicuous area for color loss and fabric compatibility before proceeding. DO NOT OVER WET. Pile fabrics may require brushing with a non-metallic, soft bristle brush to restore appearance or reset nap. Cushion covers should not be removed and laundered. To prevent overall soiling, frequent vacuuming, or light brushing with a non-metallic, soft bristle brush to remove dust and grime is recommended. When cleaning a spill, blot immediately to remove spilled material. Evenly clean the entire panel in a seam to seam fashion. Do not clean just the spots or stains. When an overall soiled condition has been reached and professional care is required, contact an IICRC Certified Firm who specializes in upholstery cleaning.

X

Cleaning only by vacuuming or light brushing with a non-metallic, stiff bristle brush. DO NOT USE ANY WATER OR SOLVENT BASED CLEANER.

UPHOLSTERY OVERALL CLEANING

For thorough cleaning, we recommend a professional in-home upholstery cleaning service. Once you contact a professional cleaner, also be prepared to give them your fabrics content information as well as the Spot cleaning code. Overall cleaning is recommended every 12 to 24 months or when an overall soiled condition has been reached. Don't wait for severe soiling. The more soiling, the less likelihood of restoring fabric. Do not remove cushion or pillow casings for separate cleaning as this may cause a slight color change in the fabric.

SLIPCOVER OVERALL CLEANING

Slipcovers are designed for style purposes only. Slipcovers are not pre-washed and washing them could result in shrinkage. Dry Clean only. Universal Furniture accepts no responsibility for cleaning results. Make sure to check cleaning codes on all fabrics prior to cleaning. For thorough cleaning, we recommend a professional in-home upholstery cleaning service to clean slipcovers while still on the base. Professional cleaning ensures the crispest look and greatest longevity. Once you contact a professional cleaner, also be prepared to give them your fabrics content information as well as the Spot cleaning code. Overall cleaning is recommended every 12 to 24 months or when an overall soiled condition has been reached. Do not wait for severe soiling. The more soiling, the less likelihood of restoring fabric. Do not remove cushion or pillow casings for separate cleaning or laundering as this may cause a slight color change in the fabric. Clean all pieces at once to avoid color variation between pieces.
