

PIG® Poly Spill Containment Pallet

#PAK210 - Holds 4 Drums • Use With Plastic & Steel Drums • 66 gal. Sump Capacity

The strongest standard pallet you can buy for everyday drum storage. Tough, affordable containment.

-
- The strongest standard pallet you can buy for everyday drum storage
- 6,000-lb. UDL capacity is strong enough to support four fully loaded steel or poly drums
- Low 10" height means loading and unloading require less effort and drum tops are within easier reach
- Molded-in sump catches leaks, drips and spills to help you comply with regulations and keep your storage areas clean and safe
- Low-density polyethylene (LDPE) construction resists UV rays, rust, corrosion and most chemicals
- Textured grating adds traction and lifts out for easy sump access
- 2-way forklift entry allows easy movement from either direction (unloaded only)
- Nestable design permits stacking when not in use; lowers cost of bulk shipping
- Compact footprint reduces floor space needed for drum storage
- Optional drain plug lets you empty sump without removing drums or grating
- We test all of our PIG Containment Pallet designs at max load for months to ensure they can handle full capacity at your facility

| Groundable for Flammables: | No |
| Number of Containers: | 4 Drums |
| Type of Container: | Plastic & Steel Drums |
| Sold as: | 1 each |
| # per Pallet: | 10 |
| Composition: | Sump - LDPE w/ UV Inhibitor Grate - Polyethylene |
| UNSPSC: | 24101905 |

PAK210 Metric Equivalent

| | |
|---------------------------|-----------|
| Load Capacity UDL: | 2721.6 kg |
| Sump Capacity: | 249.8 L |

Technical Information

Warnings & Restrictions:

Flammables Notice
If using this product with flammable liquids, please consider the regulations that apply to storage and handling of flammable liquids and the safety of this application, specifically flammable vapors, static discharge and heat sources. For further assistance, please call Technical Services.

Regulations and Compliance:

40 CFR 264.175 - Hazardous waste containment systems must be free of structural cracks or gaps, be designed to keep spilled liquids from remaining in contact with the container, prevent run-on and "have sufficient capacity to contain 10% of the volume of the containers, or the volume of the largest container, whichever is greater."

40 CFR 122.26 - When applying for a National Pollutant Discharge Elimination System (NPDES) permit, facilities must have a plan in place that describes actions, procedures, control techniques, management practices and equipment available to prevent illegal discharge of pollutants into waterways.

40 CFR 112.7 - SPCC planning requirements state that facilities subject to these regulations must have written plans in place discussing the products, countermeasures and procedures that are in place, or will be taken by the facility to prevent discharge of oil into waters of the United States.
