- Now there's a whole new way to keep your floor safe — PIG Grippy Floor Mat is highly absorbent, very low profile, extremely durable and effortless to maintain

- Proprietary adhesive sticks to the floor with a super-tight grip, but peels up easily

- Easy to use: roll out continuous walk-off coverage for entrances and walkways with no gaps, ripples or overlaps that cause slips and trips

- Easy to customize: lets you create custom-size floor mats for transition areas and wet problem spots
- Highly efficient absorbent top soaks in moisture, wicks and spreads it evenly so the mat dries out quickly — ideal for entrances and anywhere you need maximum absorbency for water
- 36" x 100' regular mediumweight roll provides enough length to create continuous walk-off runners to stop dirt and moisture at the door
- Available in gray, black and tan to match your surroundings
- Absorbs a wide variety of liquids including water, oil and grease; leakproof backing prevents liquid from soaking through to the floor
- The thinnest commercial floor mat you can buy: no rippled edges to obstruct doors or create tripping hazards. ADA compliant for

- Only a fraction of the weight of rubber-backed mats: no more back strain when you change your mats
- Completely eliminates rental mat hassles and can save up to 50% per year over rental contracts

## **Disclaimers**

### [Safety Instructions Regarding Flammable Liquids for Flame Resistant Mats](#)

Pig Absorbent Mats are flame resistant in their unused state, but take on the properties of flammable liquids they absorb. Always take proper precautions against potential ignition in handling and disposal of these mats if they have absorbed flammable liquids. For further assistance, please call Technical Services.

### [Color Variation Statement](#)

It is normal for top layer materials to show minor variations in color between production runs. This is particularly true for the grades of materials used in consumable or disposable products such as our adhesive-backed mats. New Pig makes every effort to achieve consistent color, but some variance is possible. Perceived differences in color may also result from mat layout orientation or uneven traffic wear patterns.
