

PIG® Sink & Dryer Mat with Adhesive Backing

GRP7607 24" x 35", 16 pads

Keep floors dry and safe where people wash their hands with our adhesive-backed mats. Absorbent top soaks up water, urine and other liquids.

- Sink & Dryer Mats capture water to keep floors dry in front of sinks and under hand dryers and towel dispensers; also help control slip hazards around drinking fountains, showers, and other wet trouble spots
- Permanently infused antimicrobial technology prevents the growth of odor-causing bacteria and mold on the mats to keep restrooms cleaner and fresher smelling
- Proprietary, full-coverage adhesive backing keeps mats in place underfoot with no shifting, curling or flipping up to stop slip and trip hazards; peels up easily
- Mats stick to your floor and won't budge while you clean them; simply mop them with the rest of the floor
- Durable, Hi-Trac™ Surface stands up to daily cleaning and foot traffic
- EFM™ Absorbent Technology captures water on contact, wicks it away and dries out quickly
- Impermeable backing layers stop liquid pass-through to prevent stains and grout damage
- Tested and certified by the National Floor Safety Institute (NFSI) as a high-traction surface which can reduce slip and fall claims by as much as 90% when used as part of a Floor Safety Program
- Adhesive-backed TimeStrip® Indicators (sold separately) can be applied to your Restroom Mats for easy monitoring of service life; choose 30-day or 90-day indicators
- Mats take on the properties of absorbed liquids
 - always take proper precautions when handling saturated absorbents

Safety Instructions Regarding Flammable Liquids for Flame Resistant Mats

Pig Absorbent Mats are flame resistant in their unused state, but take on the properties of flammable liquids they absorb. Always take proper precautions against potential ignition in handling and disposal of these mats if they have absorbed flammable liquids. For further assistance, please call Technical Services.

Color Variation Statement

It is normal for top layer materials to show minor variations in color between production runs. This is particularly true for the grades of materials used in consumable or disposable products such as our adhesive-backed mats. New Pig makes every effort to achieve consistent color, but some variance is possible. Perceived differences in color may also result from mat layout orientation or uneven traffic wear patterns.
