

PIG™ Drive-Over Build-A-Berm® Barrier Straight Section

PLR514 Ideal For Long-Term Custom Containment, High-Traffic Areas, 4.5" x 12' x 1.5"

Drive-over barrier springs back into shape when heavy vehicles, carts, dollies and pallet jacks pass. Custom containment berm helps you control liquids in high-traffic areas.

- The PIG Drive-Over Build-A-Berm Barrier provides semi-permanent containment in high-traffic areas on concrete, asphalt or most sealed surfaces
- Constructed of 40-ounce, vinyl-coated fabric with an open-cell foam core; berm compresses to approximately 1/4" when driven over; springs back to shape when vehicles pass
- 1.5" height accommodates low-clearance traffic like pallet jacks, heavy carts and dollies; durable enough to withstand indoor or outdoor traffic from trucks, loaded tow motors and other heavy vehicles
- Secure to floor with sealant and reinforce with predrilled aluminum mounting strips and steel anchors; seal seams with vinyl cement
- Create any configuration by combining with other Build-A-Berm components; ends overlap and can be sealed together for liquid-proof containment
- When used with standard Build-A-Berm Barriers, orange color indicates area where drivers can enter and exit
