

PIG® HazMat Chemical Absorbent Sock

#PIG301 - 3" x 10' • Absorbs up to 2 gal. per sock • 6 socks

Contain and absorb small spills of concentrated chemicals including acids, bases or other corrosives.

- Absorbs acids, bases, corrosives, chemicals and unknown liquids, even those with high concentrations like 98% sulfuric acid and 30% sodium hydroxide
- Chemical-resistant sock won't degrade or cause a dangerous reaction upon contact with corrosive spills
- Excellent for quickly diking and stopping the spread of chemical spills; for diking larger chemical spills, consider our larger diameter PIG HazMat Dikes
- Polypropylene skin resists chemicals and tearing; reduces dust and holds in liquid, even when saturated
- Polypropylene filler is highly absorbent for containing corrosive or reactive spills
- Pink color is easily distinguishable to assure workers use the correct sock during a spill emergency
- Can be incinerated after use to reduce waste
- Nobody knows more about socks than New Pig - we invented them!

Always in stock. Ships within 24 hours.
