## CARE INSTRUCTIONS

For general care we recommend dusting with a clean, dry cloth, or wiping down with soft cloth wrung dry from plain water (leaving the surface dry after cleaning).

Solvents like nail polish remover can cause significant damage to your timber furniture. Do not use these products with timber as direct contact will require re-varnishing to repair. Another common enemy of timber is direct heat, for example, placing a saucepan on a timber table. This can burn or melt the finish.

Common stains like red wine, glue and sticky fingers can be removed with a damp cloth and should be attended to as quickly as possible to avoid the stain seeping in to the timber. Regular dusting will enhance the look and longevity of your item.

## 01

Shibui Room Divider is best put together with company, so find a friend before you get started.

Find a soft floor surface such as a rug or carpet. Rest one of the large shelves flat on the floor with the underside facing up. Insert the 8 long oak dowels into the circular openings on the on the floor so all the tops (see diagram) are facing up. Insert a screw into each opening and fasten with the Hex key provided until they are firmly in place.

### Important

When fastening the screws for the top of the Shibui please do not over fasten as this can damage the oak dowels. Tighten the screws until the shelving feels secure and steady.

## 02

Whilst the structure is resting on the floor slide the first single shelf onto the leg dowels and rest at the second opening in the leg dowels. Middle holes line up with the opening in the single shelf. Insert a screw into each opening and fasten with the Hex key provided until they are firmly in place. Repeat for the second single shelf.

**Note:** This shelving is precision cut. When sliding onto the next shelf, place shelf legs at even heights at all time and always apply even pressure when threading onto legs.

## 03

Repeat the above process with all other shelves (including securing with screws) as per diagram and in this order until each shelf is in place.

## 04

Carefully turn the structure over. The brass pins can be pushed into place in the openings where each shelf meets with the oak supports. The remaining open elements on the oak supports can be inserted with the small oak plugs provided.

1. Thread mid shelf into third opening in leg dowels
2. Thread 2 x single shelves into fourth opening
3. Thread mid shelf into fifth opening
4. Thread single shelf into sixth opening
5. Thread mid shelf into seventh opening
6. Thread single shelf into eighth opening
7. Thread long shelf shelf onto eighth opening
