

## COMPONENTS

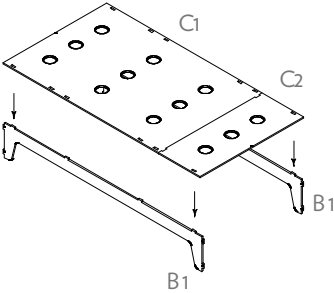

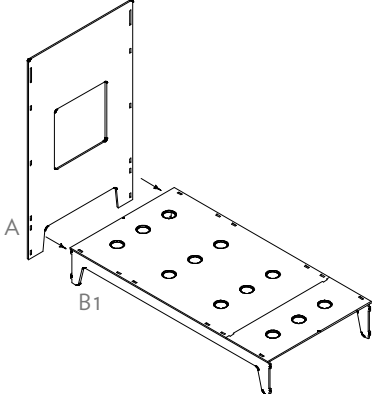

# CASTELLO

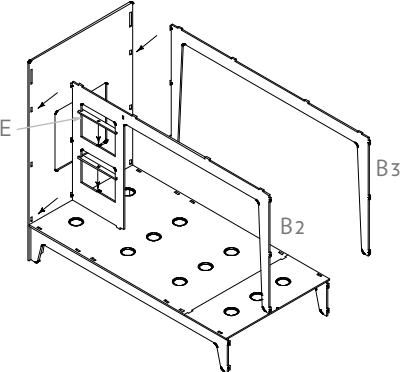

## Assembly instructions

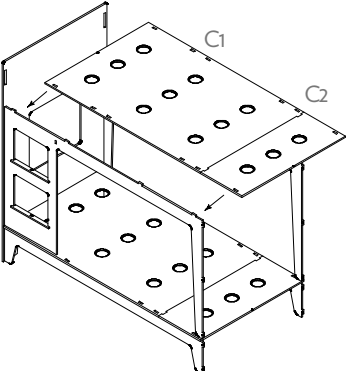

This product has been made by Totem Italia exclusively for Plyroom with precise interlocking parts. All instructions must be followed exactly for product safety. If you have questions during assembly, contact us: [info@plyroom.com.au](mailto:info@plyroom.com.au).

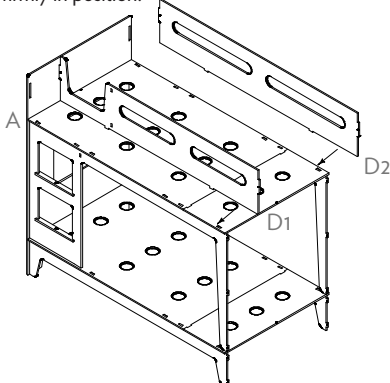

### ASSEMBLING THE BED

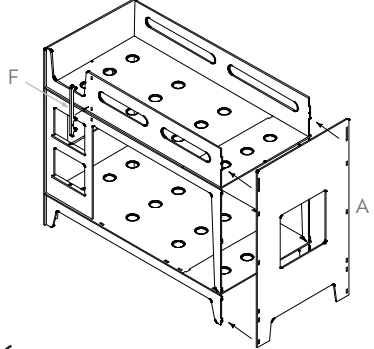

- 

Unite one C1 and C2 to create the mattress base for the bottom bunk. Insert B1 into the C base. Once all nodes are in the right position, you can use a mallet to ensure they are inserted properly.
- 

Assemble the joined C & B components into one part A. Do not insert the wooden dowels yet. Once all nodes are in the right position, use a mallet to ensure they are firmly in position.
- 

Assemble parts B2 and B3 onto the existing frame, positioning the ladder where it suits your room. Once they are firmly in place, insert the two ladder steps (piece E) unto B2 as shown. A mallet can help ensure all parts are firmly in position.
- 

Unite the other C1 and C2 as per step 1. Once it's connected lift it onto B2 and B3, and resting on the support of the A frame. Once all nodes are in the right position on B2 and B3, use a mallet to ensure they are firmly in position.
- 

Insert D1 and D2 onto the frame. Ensure D1 is on the same side as the ladder. Insert the dowels on the side with the A frame to secure the pieces. Add part F onto D1 and secure with the 3 wooden plugs. Tap them in lightly with a hammer, you may want to put a soft cloth over the hammer to protect the panel from getting scratched by the hammer.
- 

Assemble the remaining part A onto the open side. Once all nodes are in the right position, use a mallet to ensure they are firmly in position. Insert the dowels on the side with the A frame to secure the pieces.

FASTEN THE  
WOODEN DOWELS  
WITH A HAMMER  
AFTER THE JOINS  
ARE FIRMLY IN  
POSITION

REMOVE WOODEN  
DOWELS WITH A  
HAMMER ONLY WITH  
THE HAMMER  
PARALLEL TO THE  
GRAIN OF THE  
TIMBER

### IMPORTANT WARNING: TOP BUNKS AND ELEVATED BEDS ARE DANGEROUS AND ARE NOT RECOMMENDED FOR CHILDREN UNDER THE AGE OF 9

Falls from elevated beds can be fatal and deaths have occurred where children have fallen from elevated beds. This is relevant for all ages. The risk is greater for younger children. The risk of injury or death from a fall from an elevated bed compared to a non-elevated bed is: 10 x greater for 7-8 year olds 7 x greater for 9-10 year olds 3 x greater for 11-12 year olds. Children should not play on bunks. Please check the bunk bed periodically to ensure that the guardrail, access device and other components are maintained in the correct position and state of repair and that all connections are tight.

**WARNING: THE UPPER BUNK MUST BE MORE THAN 2M FROM ANY CEILING FAN.**
