

VAPORTECH™ BAKER 2.0
DIGITAL BAKING VAPORIZER KIT
USER MANUAL

FOR USE WITH  **DRY HERB**

KIT INCLUDES:

- VaporTech™ Baker 2.0
- Flat Mouthpiece
- Glass Mouthpiece
- USB Charger
- Cleaning Brush
- Packing Tool
- User Manual

LOADING YOUR DEVICE:

Remove the mouthpiece from the heating chamber.

Fill the heating chamber with your herbal blend.

Do Not Overpack.

Snap the mouthpiece back into the heating chamber.

Once reassembled, device is ready for use.

HOW TO USE:

Turning on/off: Once the device is loaded, press the power button 5 times (rapidly) to turn it on. A flashing blue light will appear indicating that your *Vaportech™ Baker* is heating up, after the light turns solid you are ready to vape. Press the power button 5 times again to turn off your *Vaportech™ Baker*

Screen Display: While your device is baking, the temperature is increasing and the screen will display the word “heat”, meanwhile the power button light will be flashing. Once *Vaportech™ Baker* reaches your desired temperature the screen will display the word “warm” and the power button light will be solid. Temperature Settings: 350°F-430°F. Temperature increases/decreases by 1 degree each time +/- button is pressed.

Safety Power Duration: After 5 minutes the device will automatically shut off. Simply press the power button 5 times in sequence to re-activate the heating chamber.

DISPLAY + TEMPERATURE SETTINGS:

Vaportech™ Baker2.0 comes with a range of 80 temperature settings. 350°F – 430°F

Our advanced OLED display indicates the battery life, temperature and baking state (*heat* for baking / *warm* for ready).

Factory Default settings temperature is 350°F

The temperature increases/decreases by 1 degree each time +/- button is pressed.

Memory Function: Every time you use your *Vaportech™ Baker2.0*, it will automatically reach for the temperature at which it was last set.

To ensure your desired baking temperature has been reached, always make sure the power button light has stopped flashing before you start vaping.

350°F to 430°F (Blue)

CHARGING:

Charging your VaporTech™ Baker 2.0 for at least 4 hours on the first charge is recommended.

Plug the provided power adapter into your power outlet and connect your device to the USB.

A slow flashing blue light indicated the device is charging, once the light is solid blue the battery is full and ready for use.

A full charge from a completely empty battery to a full one may take approx. 3 hours.

Do not leave your battery connected to your charger for extended periods of time. Once charging is complete, the battery will begin to drain over time.

CLEANING AND MAINTENANCE

CHAMBER: Lock the battery before cleaning by shutting off your device. Remove the mouthpiece and empty the chamber completely. Use the provided cleaning brush to gently remove any excess particles inside and around the chamber.

MOUTHPIECE: Wipe the mouthpiece with a damp cloth

FILTER: Using the brush tool, gently rub the filter.
Wipe with a cloth to ensure clear airway

Caution:

Do not immerse *Vaportech™ Baker2.0* in liquid of any kind, it will damage the heating component.

WARNING:

Keep out of reach of children. Do not puncture or incinerate. Do not dismantle the device beyond the cleaning and maintenance instructions.

Do not use if damaged.

Do not touch the heating cylinder for at least 10 minutes after use.
Chamber it will be very hot.

Use only the provided power supply to charge battery.

Tips:

Do not overpack the heating chamber as this will ensure easy airflow passage for even heating.

In the event that vapor is not being released, use the provided packing tool to gently stir the dry herb within the chamber.
