## About Us

**Commercial Hardware is one of the UK's leading suppliers of high-quality architectural ironmongery to both trade and individual customers.**

Since establishing in 2014, we have quickly become trusted suppliers for a wide range of door ironmongery, with all our products being carefully selected by industry specialists.

Whether you are working on a commercial or domestic project, you can rest assured that you'll be able to find the best door hardware directly from us. If there is a specific product which you require that isn't shown in the catalogue, please feel free to get in contact, and our sales team will work around the clock to source the perfect item for your requirements.

### Cost-Effective

We pride ourselves on giving you the best prices on all the name brands.

### High Quality Products

All our products are carefully selected to help ensure you get the best quality products at the right price.

### 24/7 Premium Support

Our support team offer 24/7 around the clock service to help with any advise, issues or enquiries.

### Fast & Safe Delivery

We offer next day delivery on all stock items that are packaged securely and shipped safely to you.

## MEASURING GUIDE

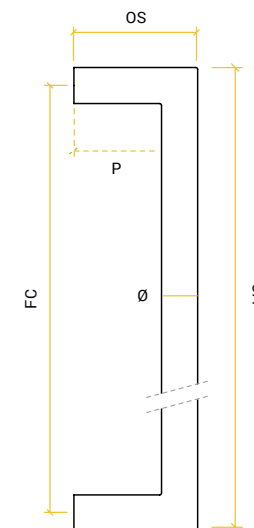

STRAIGHT PULL HANDLE

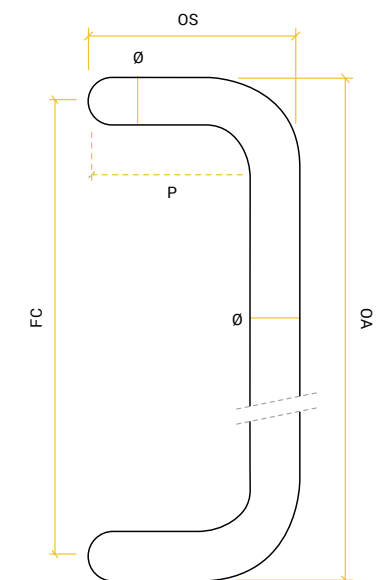

GUARDSMAN PULL HANDLE

MITRED PULL HANDLE

CRANKED PULL HANDLE

- Fixing Centres - FC
- Overall Length - O/A
- Projection - P
- Offset Size - OS
- Diameter - Ø

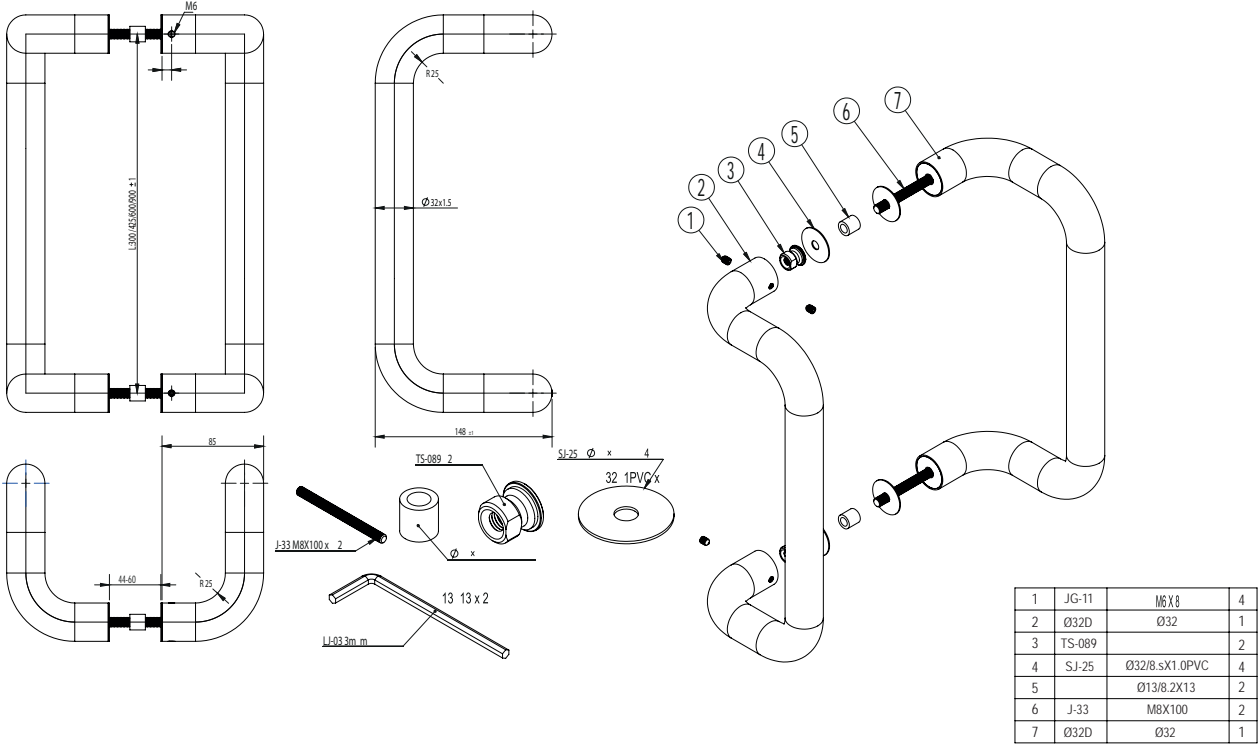

Handles

PULL HANDLES

Cranked Back to Back Pull Handles

- Features:
- 300mm c/c x 32mm Ø
  - 425mm c/c x 32mm Ø
  - 600mm c/c x 32mm Ø
  - 900mm c/c x 32mm Ø
  - Bespoke sizes available upon request
  - Satin stainless steel finish
  - Universal fixings for aluminium, composite, glass and timber doors.

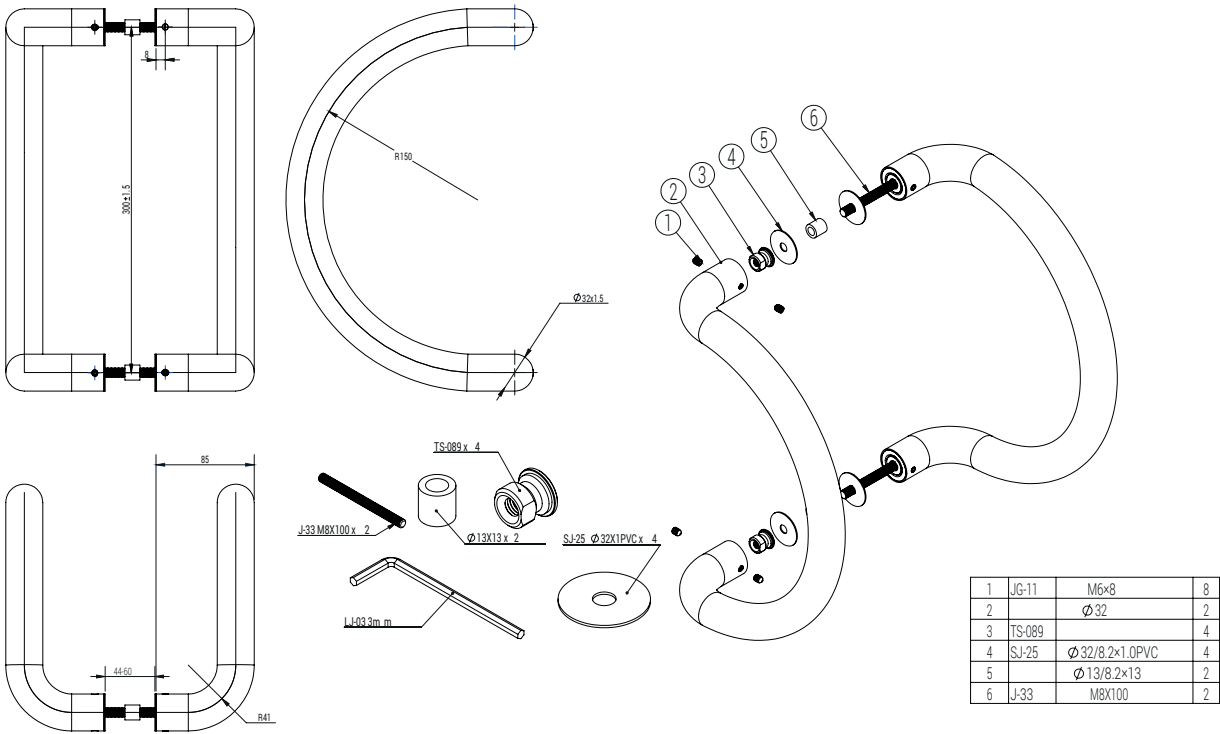

Handles

PULL HANDLES

Semi Circular Back to Back Pull Handles

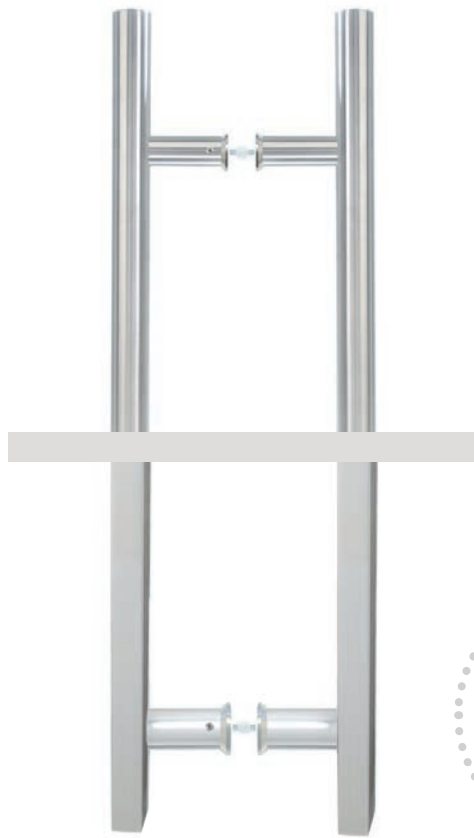

- Features:
- 300mm c/c x 32mm Ø
  - Bespoke sizes available upon request
  - Satin stainless steel finish
  - Universal fixings for aluminium, composite, glass and timber doors.

Handles

PULL HANDLES

Guardsman T Bar Back To Back Pull Handle

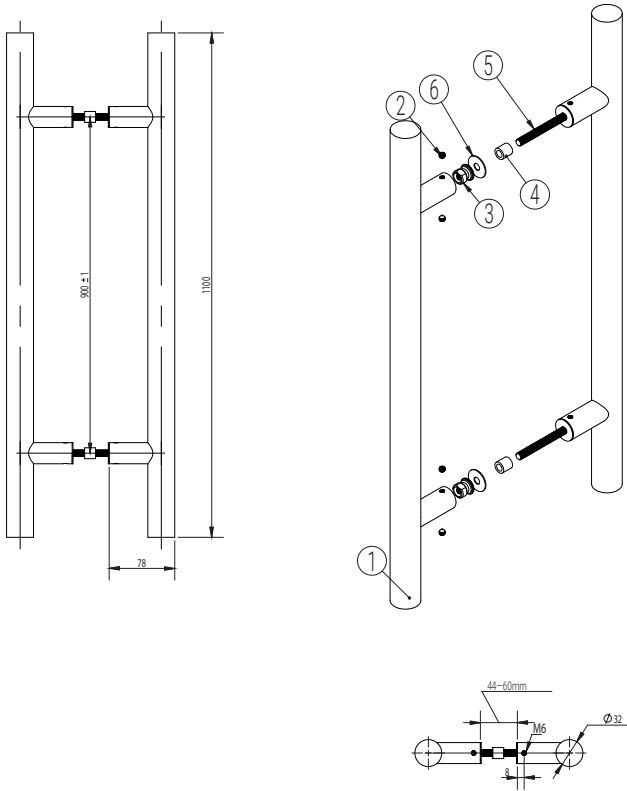

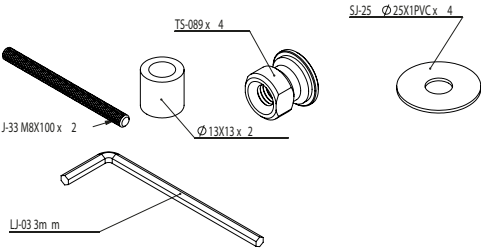

- Features:
- 900mm c/c x 32mm ø
  - Wide range of sizes available upon request
  - Satin stainless steel finish
  - Universal fixings for aluminium, composite, glass and timber doors.

Rectangular version available

Offset pillars version available

LEVER HANDLES

Lever on Backplate

Features:

- Screw on rose
- Bolt through and screw fixings included
- Micro-tight spindle
- Sprung loaded
- Available in latch lock, Euro & bathroom backplate

Finishes:

SC, PC

Return Lever on Backplate

Features:

- Grub screw fit plate
- Micro-tight spindle
- Bolt through fixings included
- Concealed fix
- Sprung loaded
- Interchangeable plates

Finishes:

SSS, PC

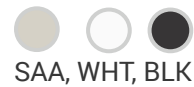

## Handles

## PAD HANDLES

## Finishes:

SAA, WHT, BLK

## Aluminium Pad Handle

## Features:

- Aluminium pad handle is the perfect set choice for commercial aluminium doors
- Ever popular handle is easily installed
- Complete with all the required fixings
- The handle has a height of 230mm or 300mm

## Handles

## UPVC HANDLES

## Finishes:

WHT, BLK, PB, SC, PC

## Universal Retrofit Door Handle

## Features:

- One handle designed to fit 75% of multi-point locks
- Sprung lever door handle
- 270mm long backplate to cover any existing holes
- Adaptable vertical handle position to suit lock centres between 59mm - 96mm
- Fits the majority upvc door mechanisms

## Paddle Handle

## Finishes:

SAA

## Features:

- Paddle handle for use with round cylinder deadlatches
- Suits 44mm thick doors
- Cam plug non-handed - reversible in the field
- Suitable for aluminium and steel doors

## PAS 24 Door Handle

## Features:

- High security door handle
- TS007 BSI kitemark 2 star rating / PAS 24 Enhanced Security / Secured by design Accredited
- 92 PZ with 122mm fixing centres

## Finishes:

WHT, BLK, PB, SC, PC

Official Police Security Initiative

DOOR KNOBS

Finishes:

Ball Mortice Knob

Features:

- Unsprung rose
- 50mm rose dia.
- 55mm ball dia.
- 90mm projection

Finishes:

Centre Door Knob

Features:

- Concealed fix square rose
- Substantial square centre door knob on a cylindrical stem
- Universal fixings for aluminium, composite, glass and timber doors.

Finishes:

Ringed Mortice Knob

Features:

- 50mm knob dia.
- 70mm rose dia.
- 82mm projection
- Solid construction
- Grub screw spindle fixing
- Unsprung rose

Handles

DOOR KNOBS

Finishes:

BALA Entrance

Features:

- Concealed fixing from one side
- Set of two keys included
- Lightly sprung for ease of opening
- Ideal for use throughout your home and in communal areas

Finishes:

BALA Privacy

Features:

- Ideal for bedrooms
- Suitable for private rooms in shared houses
- Can be locked from both sides
- Slam latch auto deadlocked when closed
- Emergency release slot on the outside

Finishes:

BALA Passage

Features:

- Concealed fixing from one side
- A non-locking latch knob set - allowing easy access to rooms at all times
- Lightly sprung for ease of opening
- Ideal for use throughout your home and in communal areas on internal doors where a lock is not required

# DOOR CLOSERS

## Door Closers

## DOOR CLOSER APPLICATION

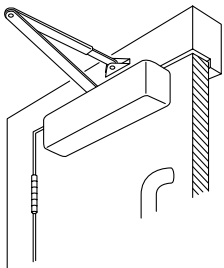

### MOUNTING POSITIONS

There are three common positions in which a door closer can be mounted, each one is dependent upon the type and use of the door.

• Fig.1

DOOR MOUNTED  
PROJECTING ARM,  
PULL-SIDE

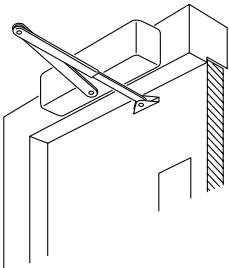

The most common application, provides a high degree of door control and range of adjustment. The closer is mounted on the pull side of the door with the arm mounted on the frame. When the door opens the arm passes over the door.

• Fig.61

TRANSOM MOUNTED  
PROJECTING  
ARM PUSH-SIDE

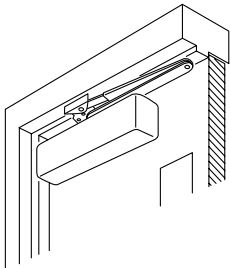

The closer is mounted on the frame above the door. The foot is mounted on the push side of the door. This position is intended for external doors opening outward to protect the closer from external elements.

• Fig.6

DOOR MOUNTED  
PARALLEL ARM,  
PUSH-SIDE

The closer is mounted on the push side of the door. When the door opens, the closer arm swings with the angle of the door. This position stops the closer protruding into the room and is suitable for use on narrow door frames.

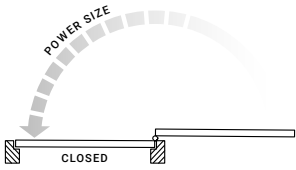

### DOOR CLOSER FEATURES

#### POWER SIZE

The Power Size of a door closer is measured in accordance with the Closing Torque that is achievable on the closing cycle.

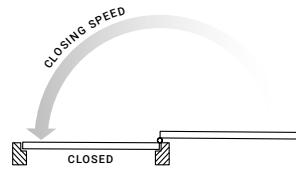

The BS EN 1154 Standard classifies closers from a Size 1 through to a size 7 and recommends the use in accordance with the door width and door mass (weight).

Power Sizes can be fixed, selectable or adjustable.

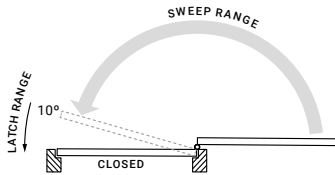

#### ADJUSTABLE CLOSING SPEED

Controlled door closers offer adjustability to the speed that the door will operate, the closing speed has adjustment from the maximum opening angle through to the last 10 to 15°.

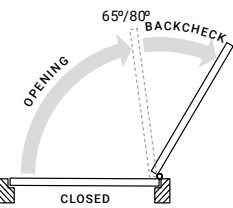

#### ADJUSTABLE LATCH ACTION

This allows speed adjustability on the last 10 to 15° to assist with overcoming latches and seals.

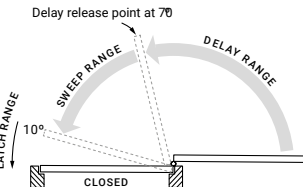

#### ADJUSTABLE BACKCHECK

The backcheck function slows the speed of the door whilst in the opening cycle, the function is to prevent damage being caused to the door, associated hardware or adjacent walls in the event of the door being flung open (Backcheck is not an alternative to a door stop).

#### ADJUSTABLE DELAYED ACTION

The delayed action function slows the first part of the closing cycle down. Its function is particularly useful for disabled / elderly who may need additional time to pass through the doorway, delayed action normally releases around 70° where the standard closing speed will then commence.

### FIRE SAFETY – CONTROL OF THE SPREAD OF FIRE AND SMOKE

All dedicated fire-resistant doors should be fitted with a door closer that is successfully tested to BS EN 1154.

A closed fire-resisting door is designed to withstand attack by fire for a specified period of time, installation of a door closer will ensure that the door is mechanically closed when not in use.

#### BS EN 1154:1997

This is the European standard for the performance of controlled door closing devices. It uses a 6 digit coding system to give clear details on the capabilities and performance levels of what the specific door closer model has been tested and approved to.

Example 4 8 2 1 1 4

The below detail gives the breakdown of each code:

#### DIGIT 1 CATEGORY OF USE

Grade 3 : For closing doors from at least 105° open  
Grade 4 : For closing doors from 180° open

#### DIGIT 2 TEST CYCLES

Grade 8 – 500,000 test cycles

#### DIGIT 3 TEST DOOR MASS/SIZE

| 1                      | 2                           | 3              | 4                 | 5                   | 6       | 7                          | 8                                 | 9  |
|------------------------|-----------------------------|----------------|-------------------|---------------------|---------|----------------------------|-----------------------------------|--|
| Door closer power size | Recommended door leaf width | Test door mass | Closing moment    |                     |         | Any other angle of opening | Opening moment between 0° and 60° | Door closer efficiency between 0° and 4° |
|                        |                             |                | Between 0° and 4° | Between 68° and 92° | Nm min. | Nm min.                    | Nm max.                           | % min.                                   |
| 1                      | < 750                       | 20             | 9                 | < 13                | 3       | 2                          | 26                                | 50                                       |
| 2                      | 850                         | 40             | 13                | < 18                | 4       | 3                          | 36                                | 50                                       |
| 3                      | 950                         | 60             | 18                | < 26                | 6       | 4                          | 47                                | 55                                       |
| 4                      | 1100                        | 80             | 26                | < 37                | 9       | 6                          | 62                                | 60                                       |
| 5                      | 1250                        | 100            | 37                | < 54                | 12      | 8                          | 83                                | 65                                       |
| 6                      | 1400                        | 120            | 54                | < 87                | 18      | 11                         | 134                               | 65                                       |
| 7                      | 1600                        | 160            | 67                | < 140               | 29      | 18                         | 215                               | 65                                       |

#### DIGIT 4 FIRE BEHAVIOUR

Grade 0 – Not suitable for use on fire/smoke door assemblies  
Grade 1 – Suitable for use on fire/smoke door assemblies

#### DIGIT 5 SAFETY

All doors closers are required to satisfy the essential requirement of safety in use. Therefore only Grade 1 is identified.

#### DIGIT 6 CORROSION RESISTANCE

Five grades of corrosion resistance are identified according to EN 1670:  
Grade 0 – No defined corrosion resistance  
Grade 1 – Mild resistance  
Grade 2 – Moderate resistance  
Grade 3 – High resistance  
Grade 4 – Very high resistance

Door Closers

SURFACE MOUNTED

Adjustable Power  
Size 2-4

Testing & Standards:

- CE marked against EN1154
- Included in successful fire test to EN1634
- Suitable for use on timber fire doors of up to 120 minutes fire resistance.
- Safe in use
- High corrosion resistance

Product Overview:

An efficient, durable and stylish variable power overhead door closer. Suitable for most applications particularly those with constant use which require a backcheck function.

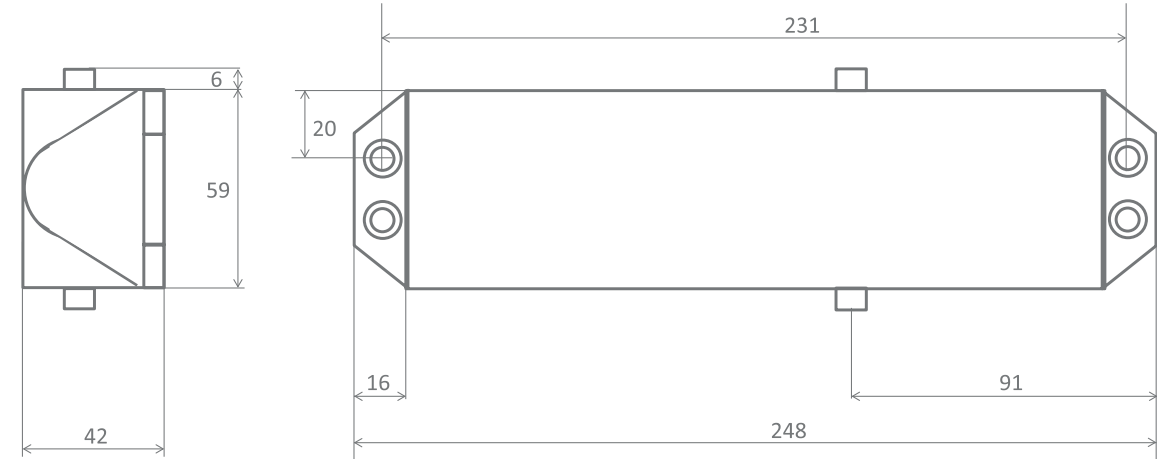

FIG 1

Finishes:

SSS, PSS, PB

Door Closers

SURFACE MOUNTED

Adjustable Power  
Size 2-5

Testing & Standards:

- CE marked against EN1154
- Included in successful fire test to EN1634
- Suitable for use on timber fire doors of up to 120 minutes fire resistance and 240 minutes on steel doors
- Certifire approved - refer to CF689 for scope of approval
- Safe in use
- High corrosion resistance

Product Overview:

A highly efficient, durable and stylish variable power overhead door closer. Suitable for most applications particularly those with public use.

Door Closers

SURFACE MOUNTED

Adjustable Power Size 2-4 Guide Rail

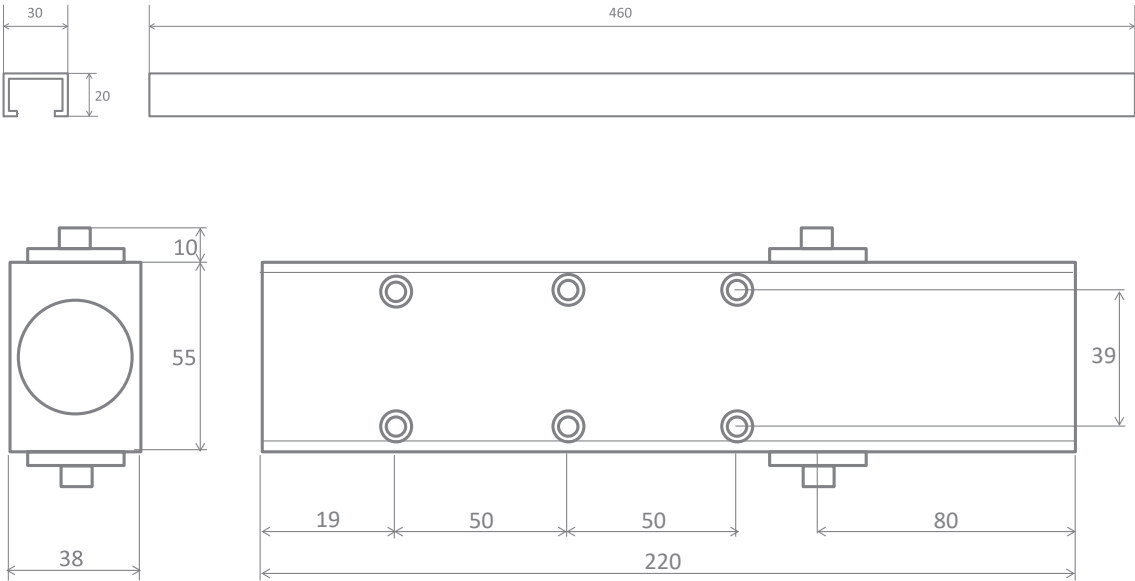

Product Overview:

A durable and stylish variable power overhead guide rail door closer. Suitable for a variety of applications where BS8300/Equalities Act/Approved Document 'M' is not a requirement.

Features:

- CE marked against EN1154
- Included in successful fire test to EN1634
- Suitable for use on timber fire doors of up to 120 minutes fire resistance
- Safe in use
- High corrosion resistance

Finishes:

Door Closers

SURFACE MOUNTED

Fixed Power Size 3

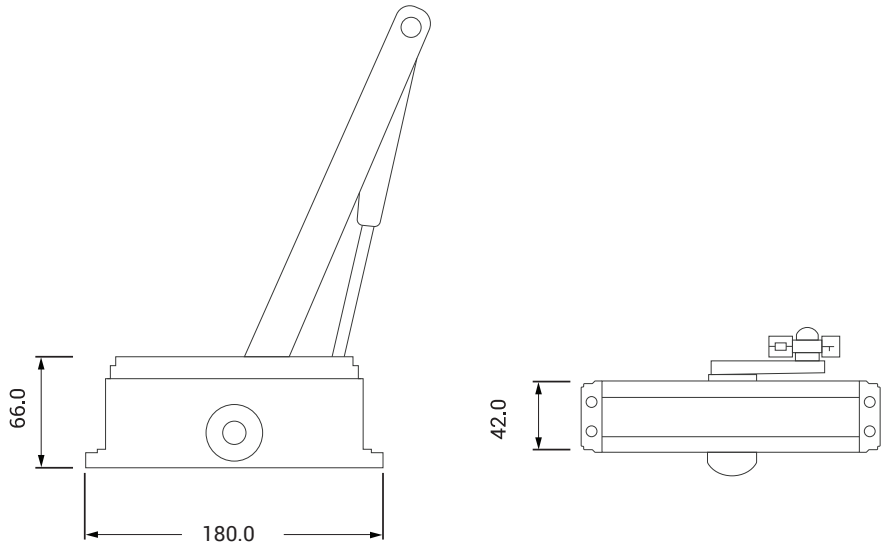

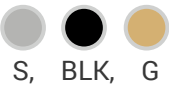

Product Overview:

A durable and stylish variable power overhead guide rail door closer. Suitable for a variety of applications where BS8300/Equalities Act/Approved Document 'M' is not a requirement.

Features:

- Suitable for doors upto 60kg, 950mm wide
- For inward and outward opening doors
- Non-handed
- Adjustable closing speed
- Adjustable latch speed
- BS EN 1634
- BS EN 1154 : 1996

TRANSOM MOUNTED

Transom Door Closer

| Power size           | 2   | 3    | 4    |
|----------------------|-----|------|------|
| Max. Door width (mm) | 900 | 1000 | 1100 |
| Max. Door width (kg) | 100 |      |      |

Features:

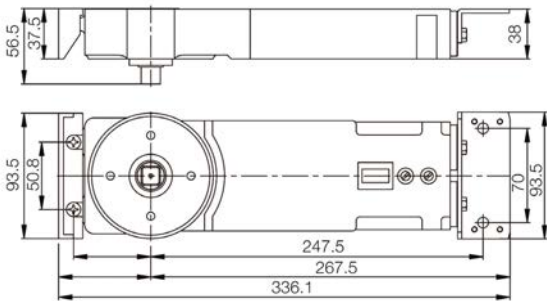

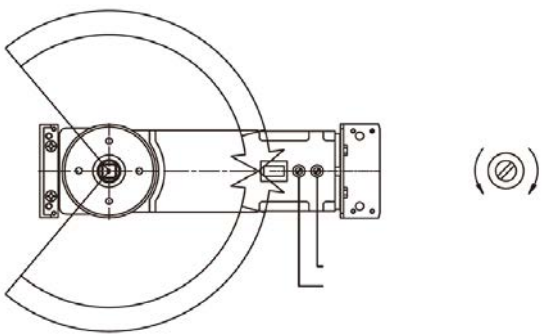

- Fixed power size 2/3/4
- Adjustable closing & latching speed
- Maximum door opening angle at 130°
- Mechanical hold-open 90°
- Concealed transom mount
- Complete with 65mm or 70mm fixing brackets & Fixings

Accessories:

- Standard side load arm
- Short side load arm
- End load arm
- Front bracket
- Back bracket
- Standard pivot
- Heavy duty pivot max door weight: 150kg

Application Ranges:

- Suitable for single & double doors
- Available for light, medium & heavy duty doors

Door Closers

TRANSOM ACCESSORIES

Arm Sets

Features:

- End load arm, standard side load arm & short side load arm
- Fully adjustable
- Hole and centre lines in channel for easy location of pivot point.
- Offering adjustment through hinge stile.
- All armsets are supplied complete with fixings blocks and tag plates

Bottom Pivots

Features:

- Heavy duty
- RS10 Heavy duty
- Standard
- All bottom pivots are supplied with fixings

Door Closers

FLOOR SPRINGS

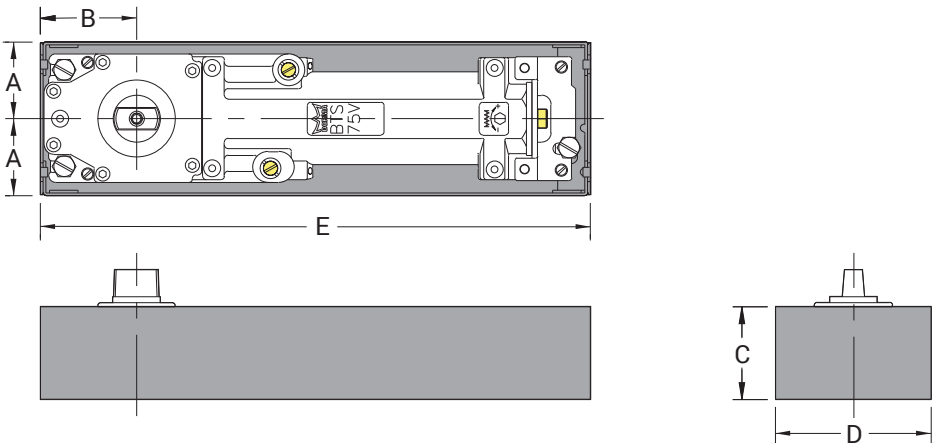

Universal Floor Spring

Product Overview:

Offering adaptability to almost any installation. The closer’s compact body permits its use where a larger closer would be prohibitive.

Features:

- Adjustable spring sizes
- Non-handed unit suitable for both single and double-acting doors
- Controlled closing with two independent values
- Single point hold open available at 90°
- Single point hold open available at 105°

|             | A                | B         | C  | D     | E      |

| Millimeters | 36 – 46          | 51 – 57   | 51 | 82    | 285    |

Door Closers

FLOOR SPRINGS

Heavy Duty Universal Floor Spring

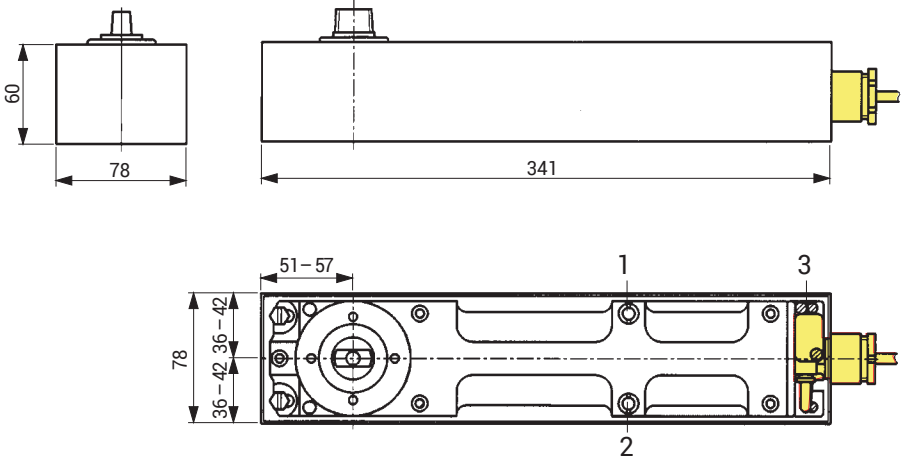

Product Overview:

Offers the perfect combination between freedom of creation and greatest reliability by their concealed floor mounting, providing a multitude of functions at the same time.

Features:

- Adjustable spring sizes
- Non-handed unit suitable for both single and double-acting doors
- Controlled closing with two independent values
- Single point hold open available at 90°
- Single point hold open available at 105°

- 1. Closing speed adjustment valve
- 2. Latching speed adjustment valve
- 3. Plug connector with cable for EMB & FLB power supply

## Locks

## DEADLOCK

## High Security Hooklock

## Features:

- Complies with BS EN 12209 at security grade 6
- Bolt withstands 10kN side load in unsupported application and 6kN end load
- Barbolt with anti-spread feature incorporating the benefits of hookbolt
- Enclosed mechanism prevents potential for tampering while under attack
- Specifically designed to fit into thermally broken and shopfront applications

## Locks

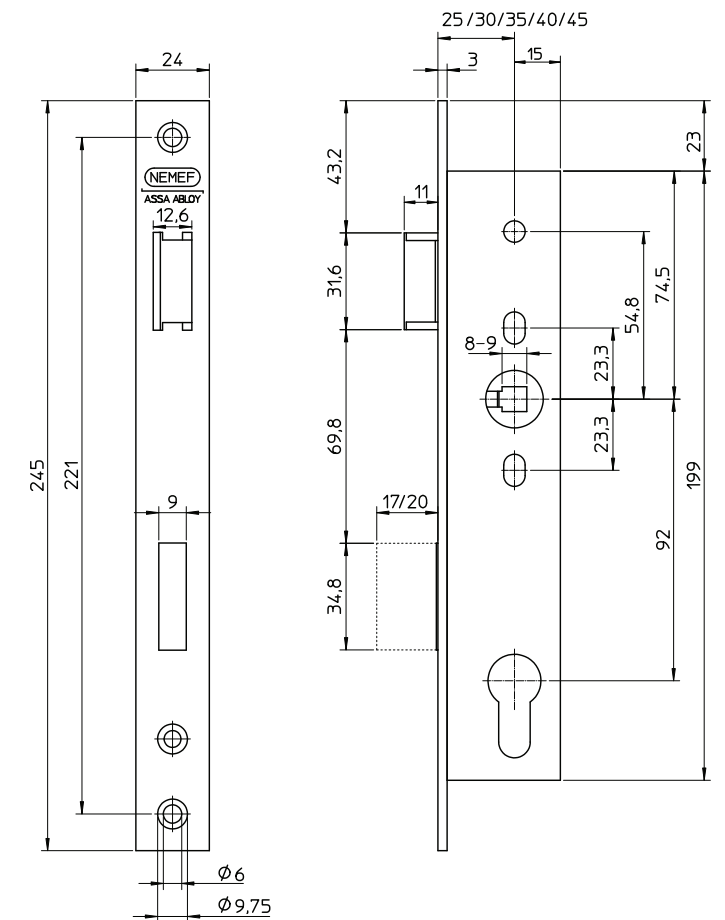

## NARROW STYLE

## Narrow-Style Sash Lock

## Features:

- For European profile cylinder.
- Key action on latch bolt.
- Single throw dead bolt.
- Easy reversible latch bolt.
- Backset 25, 30, 35, 40 and 45 mm.
- Distance 92 mm.
- U-forend on request.
- Forend stainless steel.
- Dead and latch bolt die-cast bright nickel-plated.
- Without strike plate.
- Latch, Anti-Panic, Nightlatch versions available

Suitable for inner & entrance doors.

Square Profile  
Din Lock

## Features:

- Available with 55 & 60mm backsets
- Case size (55mm backset) – 85 x 165mm
- Case size (60mm backset) – 90 x 165mm
- Available as Euro, sash, nighlatch & bathroom
- Stainless steel latch bolt & dead bolt
- Includes grip tight follower spring
- Includes anti-rattle strike and dust box
- Available in square and radius profiles

## Locks

## MULTIPOINT LOCK

Auto Locking  
Multi-point Lock

## Features:

- Automatically locks as soon as door is closed
- Suitable for aluminium, composite, glass & timber doors
- Available for right and left handed with keeps to suit

## Lift To Lock Set

## Features:

- 90mm case size
- 60mm backset
- Square profile & radius profile available
- Grade 304 stainless steel latchbolt & deadbolt
- Anti-rattle strike
- Grip tight follower
- 72mm c/c
- For use with lift to lock lever

Latch & Deadbolt  
Multi-point Lock

## Features:

- Suitable for Upvc, composite & timber doors
- To be used with lever handles with 30mm & 45mm backset
- Tested to PAS24 & accredited to Secured by Design

Door Lever Set -  
Push on Rose

- Reversible Latch
- Available as FB4
- All keys sold separate

# CYLINDERS

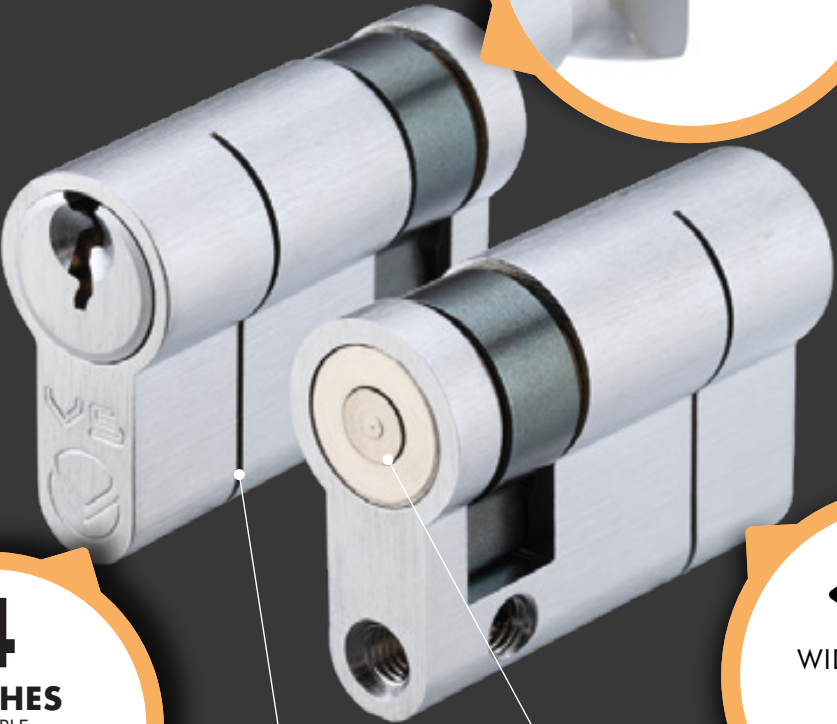

COMMERCIAL HARDWARE

**COMMERCIAL  
HARDWARE**

A range which comprises of single, double & turn cylinders with euro & oval bodies. Keyed to differ, keyed alike or master keyed versions are available.

Break-off system

Adjustable CAM

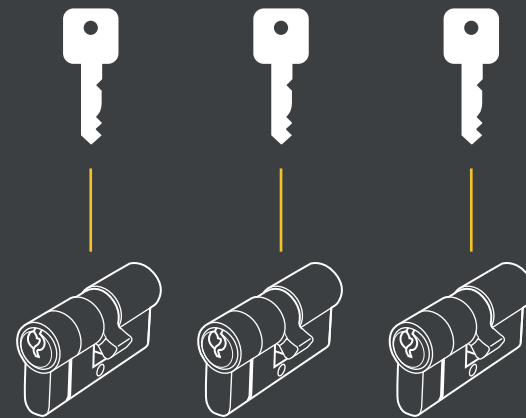

**DID YOU KNOW ...**

**WE OFFER OUR OWN BESPOKE CYLINDER  
KEYING SERVICE?**  
CALL US ON 0333 355 3801 FOR INFORMATION.

## CYLINDERS KEYING GUIDE

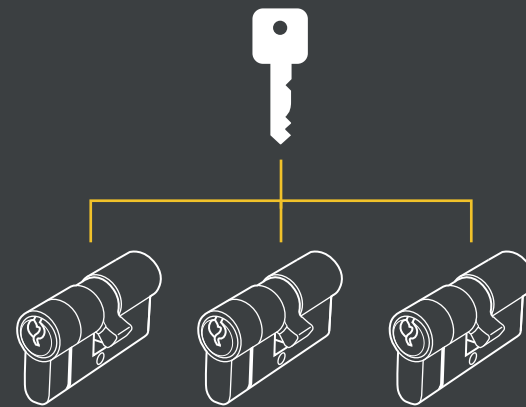

### KEYED TO DIFFER

EACH LOCK IS OPENED BY ITS OWN UNIQUE KEY, WHICH DOES NOT OPEN ANY OTHER LOCK.

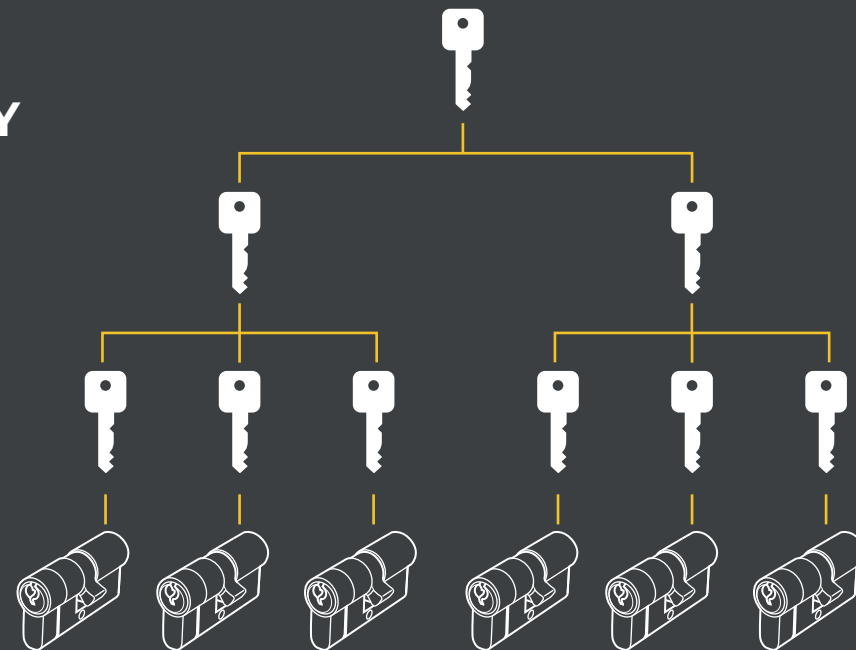

### KEYED ALIKE

ALL CYLINDERS IN THE SET ARE OPENED BY THE SAME KEY, THIS OPTION PROVIDES SAME KEY CONVENIENCE AND ELIMINATES THE NEED FOR MULTIPLE KEYS WHERE NUMEROUS CYLINDERS ARE USED.

### UNDER MASTER KEY

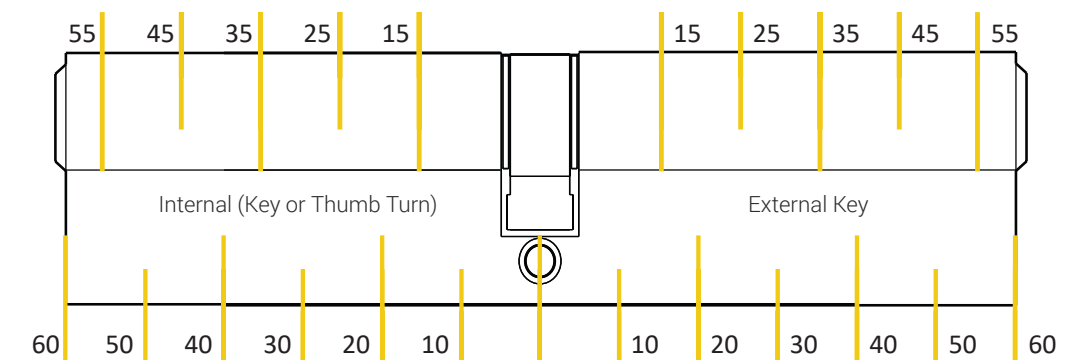

WHERE ALL CYLINDER LOCKS ARE OPENED BY A SINGLE MASTER KEY THEN EACH OF THE CYLINDER LOCKS ARE OPENED BY THEIR OWN KEY, OFTEN REFERRED TO AS THE SLAVE, CHANGE OR DIFFER KEYS.

## Cylinders

## MEASURING CYLINDERS GUIDE

### How To Measure a Cylinder

All Dimensions are in mm

## CYLINDER STANDARDS

Cylinders

EURO PROFILE CYLINDERS

Euro Single Cylinder

Finishes:

- SC, PB, BK, PC

Standards:

Features:

- BS EN 1303
- BS EN 1634-1
- Anti-drill, Anti-pick & Anti-snap
- Adjustable cam
- Complete with 3 keys & fixing pin
- Full range of sizes available

Cylinders

RIM CYLINDERS

Rim Cylinder

Finishes:

- SC, PB, BK, PC

Standards:

Features:

- BS EN 1303
- BS EN 1634-1
- Anti-drill & Anti-pick
- Complete with 3 keys & trim ring

Finishes:

- SC, PB, BK, PC

Standards:

Euro Double Cylinder

Features:

- BS EN 1303
- BS EN 1634-1
- Anti-drill, Anti-pick & Anti-snap
- Complete with 3 keys & fixing pin
- Full range of sizes available
- Offset sizes available

Finishes:

- SC

Standards:

Threaded Rim Cylinder

Features:

# PANIC HARDWARE

COMMERCIAL HARDWARE

## Panic Hardware

## APPLICATIONS

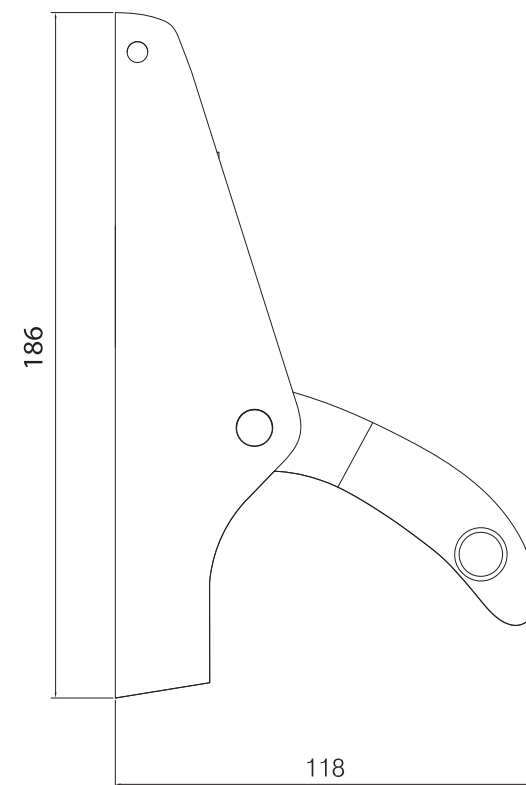

Panic Hardware

## EXIT DEVICE

Concealed Rod  
Crash Bar

## Features:

- Range of horizontal cross bars and push bars are compliant to BS EN 1125.
- The cross bar is extruded aluminium in a silver satin, dark bronze, green or black anodised finish.
- The exit devices have nylon bushes for silent operation, with heavy duty lever springs for durable operation of the lever arms.
- Suitable for narrow and widestile doors.
- All fixings are concealed to ensure an aesthetically pleasing finish. The exit device houses do not exceed 120 x 186mm projection.
- Heavy duty lever springs for durable operation of lever arms
- Standard model suitable for doors of up to 1155mm wide
- Extra wide model long crossbow suitable for doors up to 1220mm wide

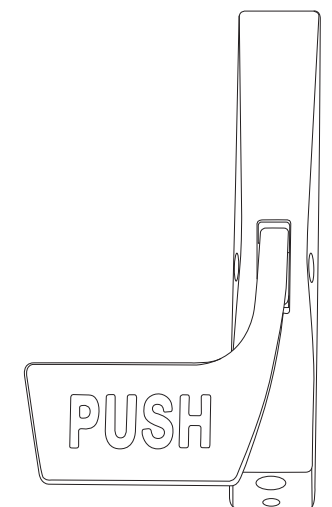

Panic Hardware

## EXIT DEVICE

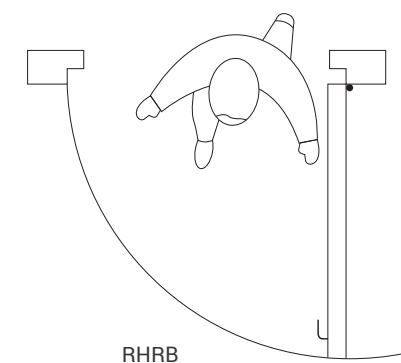

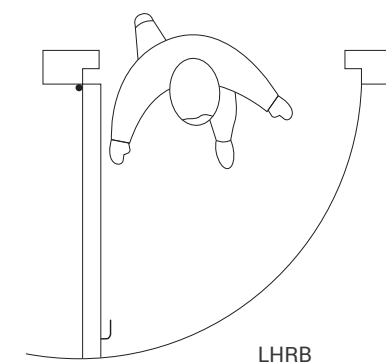

Concealed Rod  
Paddle Handle

## Features:

- Emergency device installed to the opening jamb
- Push paddle handle with engraved "PUSH"
- Compliant to BS EN 179
- Finished in Satin Chrome
- Operating paddle handle and lever do not exceed 120 mm x 186 mm projection
- Standard mortice rim cylinder lock available as option

HAND OF DOOR

## Panic Hardware

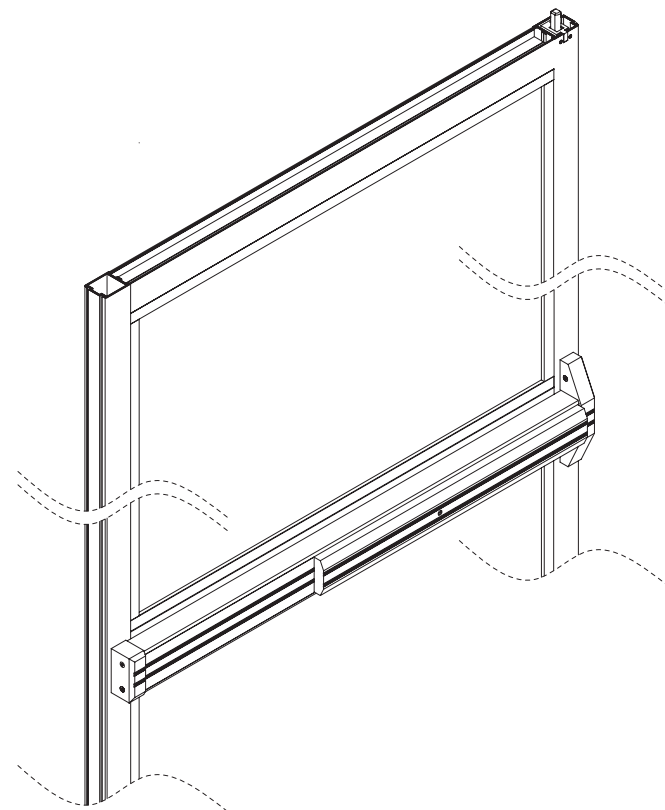

## EXIT DEVICE

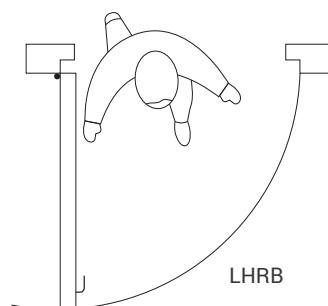

### Concealed Rod Soft Touch Bar

## Features:

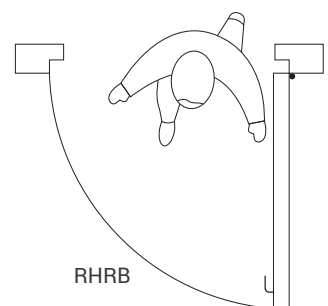

- Heavy duty lever springs and internal mechanism for durable, smooth operation.
- Plated steel and stainless steel internal components.
- 8.5mm diameter, steel locking rods.
- 16mm bolt throw
- Suitable for door widths as narrow as 700mm and 2135mm high.
- Extruded aluminium touch bar, anodized finish with coloured alloy end caps to match.

HAND OF DOOR

LHRB

RHRB

## Panic Hardware

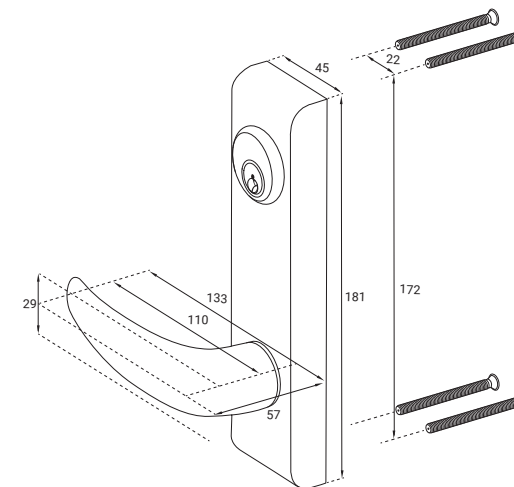

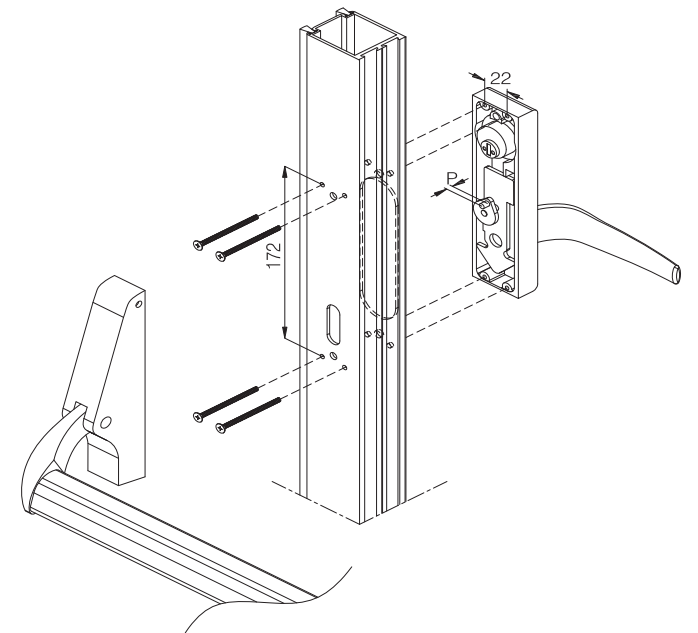

## EXIT DEVICE

### Outside Locking Handle

## Features:

- Key controlled
- Outside trim
- For use concealed exit devices.
- Uses screw in mortice cylinder with ms type cam.
- Not handed (field reversible).
- Covering a range of thickness doors from 46mm - 67mm.

ELECTRIC STRIKE

## Universal 12/24V DC Electric Strike

### Features:

- Power Input: 12 V DC (24V DC available by special order)
- Voltage Tolerance:  $\pm 15\%$
- Current Draw: 0.25 A@12 VDC; 0.15 A@24 VDC (at temperature 20°C)
- Sensor Switch monitored output (GK-310M), Rating 2A@125V, indicates the lockset locked or unlocked status
- Operating Temperature: -10~45°C
- Humidity: 0~95% non-condensing
- Lock's surface Temperature (when the power is on):  $\leq$  current temperature +20°C
- 2000 LBS jaw strength pull testing
- Tested to 1,000,000 cycles
- Weight (Approx.) : 400 g

## 10001 Series Mag Lock

## Product Overview:

- Operating voltage: 12/24 VDC
- Current draw: 500mA/12VDC; 250mA/24VDC (at temperature 20°C)
- Operating temperature: -10~55°C(14~131°F)
- Humidity: 0~95% non-condensing.
- Holding force: Up to 600 lbs(272 Kg)
- Dimensions:
  - Magnet:(L) 250, (W) 42, (D) 26 mm
  - Armature plate:(L) 185, (W) 38, (D) 12 mm
  - Mounting plate:(L) 250, (W) 25, (D) 5 mm
- Net Weight: 2.0 Kg

## Features:

- High reliability
- Aluminium anodized casing
- MOV provides spike and surge protection
- Dual voltage 12 or 24 VDC (selectable) Single voltage only 12 VDC (10002BZ)
- Anti-Residual magnetism function

## DIGITAL LOCKS

## Digital Lock for Aluminium Doors

## Features:

- Complete with 60mm Stainless Steel Latch
- Suitable for DDA applications
- New & improved clutch and coding chamber design
- Clutched keypad handle
- Cycle tested to 100'000 operation
- Over 2000 code combinations available

## Digital Lock With Optional Holdback

## Features:

- 1000+ combinations
- For internal or external applications
- Simple installation
- Optional holdback
- Suitable for 35-60mm thick doors
- Supplied complete with tubular latch and fixings

# DOOR HINGES

## Hinges

## A BRIEF GUIDE TO HINGES

### STANDARD DOORS

- Is it a fire, smoke or emergency escape door?
- The size and weight of the door?
- Is it an internal or external door; is it near the coast or in a swimming pool?
- Is it to be used in an office environment with minimal use or for higher volume traffic such as a hospital, school or shopping centre?
- Is there any other door hardware to be fitted that may affect performance (ie door closer, door stops).

### FORCES OPERATING ON A DOOR

There are two main forces that the hinge has to cope with. The vertical load; and, as hinged doors are side-hung, the horizontal or lateral load.

The **vertical load** is a direct result of the gross door weight.

The **horizontal load** is created by:

- The door weight
- The door height to width ratio
- Where the hinges are positioned.

The wider the door is in relation to its height, the greater the side load that the hinges and their fixings have to support.

### ADJUSTED DOOR WEIGHT

Hinge specification is also determined by the adjusted door weight. We recommend wherever possible to refer to the actual weight supplied by the door manufacturer.

| Adjusted door weight calculation table |   |              |                        |
|--|---|--------------|------------------------|
| Actual Door Weight                     | Doors of excess width, please refer to Side Loading Calculation table |              | = Adjusted Door Weight |
|  | Door Closer   | +20%         |                        |
|  | Door Closer (Backcheck )  | +75%         |                        |
|  | Extra Heavy Use<br>Light Use  | +10%<br>-10% |                        |

Fig.1

### STANDARD DOORS

The standard positioning when fitting three hinges to a door. This gives the most effective load bearing capability.

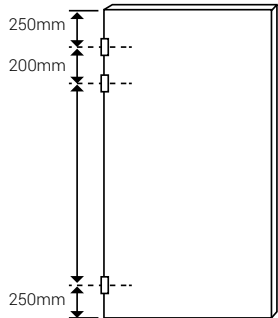

Fig.2

### LIGHTWEIGHT DOORS

Three hinges may be fitted as shown. On doors subject to warping (such as glazed doors), fit a third hinge at the centre of the door.

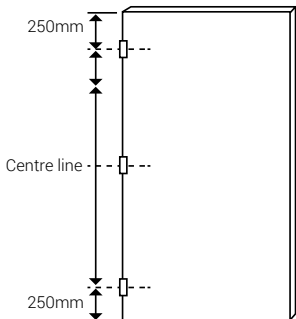

Fig.3

### HEAVY DOORS

When load bearing is the prime consideration, fit four hinges as shown.

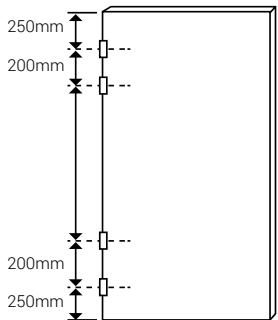

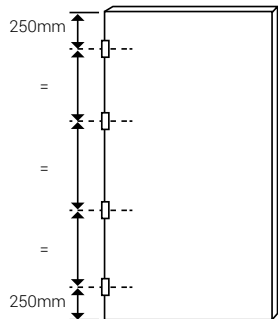

Fig.4

### TALL DOORS (OVER 2100MM)

On all door or those which are particularly subject to warping (such as glazed doors) fit four hinges equally spaced, as shown.

Hinges

DOOR HINGES

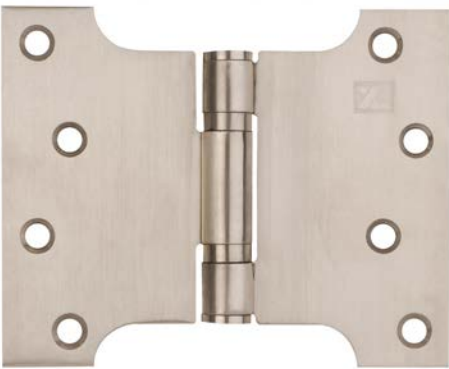

Ball Bearing Hinge

Features:

- BS EN 1935 : 2002 Grade 13

# BOLTS & LATCHES

COMMERCIAL HARDWARE

## Bolts & Latches

## LATCHES

### Finishes:

SSS, PB, PSS, PCB

## Tubular Latch

### Features:

- Bolt through, with guided latch bolt
- Adjustable strike
- Backset options; 44, 56, 83, 106, 132mm
- Radius & squared profiles

### Finishes:

SC, PC,

## Smart Latch

### Features:

- 57mm Backset Latch (70mm Total)
- Privacy, Passage versions available

### Finishes:

SSS, PB, PSS

## Adjustable Roller Latch

### Features:

- Brass roller latch
- Concealed adjustment
- 45mm depth
- Supplied with matching strike plate and fixing screws

Bolts & Latches

RACK BOLTS

Finishes:

- SSS, PB, PSS, PCB

Suitable with turn & release

Tubular Deadbolt

Features:

- Bolt through, with guided dead bolt
- Backset options; 44, 56, 83, 106, 132mm
- Radius & squared profiles

Bolts & Latches

RACK BOLTS

Finishes:

- SC, PB, PC

Barrel Bolt

Features:

- Heavy duty
- Complete with three keeps & fixings
- 16mm bolt dia.
- Face-fix
- 100, 150, 200, 300, 450, 600 x 38mm

Finishes:

- SC, PB, PC

Indicator Bolt

Features:

- Indicator 40 x 60mm
- Lock 65 x 40mm

Finishes:

- SC, PB, PC

Slide Surface Bolt

Features:

- Simple slide function
- Complete with three keeps & fixings
- Face-fix
- 102, 150, 202 x 36mm

Finishes:

- SC, PB, PC, PCB

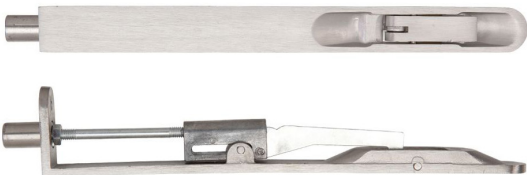

Suitable with rack bolt key

Rack Bolt

Features:

- Backsets options; 17, 32mm
- With solid brass bolt
- Complete with fixings

Finishes:

- SSS, PSS

Suitable with Dust Socket

Lever Action Flush Bolt

Features:

- 150, 203, 305, 247, 309, 914 x 20mm
- 11mm dia. bolt
- 15mm bolt throw
- Adjustable bolt throw
- Square & Radius profile

## Bolts &amp; Latches

## FLUSH BOLTS

## Squared Flush Bolt

## Features:

- 130 x 26mm
- Square profile
- With anti-rattle sleeve
- Hardend steel bolt
- Complete with fixings

## Finishes:

SAA

## Bolts &amp; Latches

## TOP CENTRES

## Adjustable Top Centre

## Features:

- Top centre for double action doors
- For timber and metal doors
- Complete with fixing screws
- Centre of pivot 50 mm from end of plate

## FINISHES:

S

## Radius Flush Bolt

## Features:

- Zinc plated with anti-rattle sleeve
- 7mm zinc plated steel rod with 40mm thread length
- Deep finger recess and large lever for easy operation
- Corners 2.5mm radius for easy matching of cut out
- Comes complete with guide

## Finishes:

SAA

## Light Duty Top Centre

## Features:

- Suitable in combination with 4000 and 6000 Series Closers
- Material Die Cast
- Comes with Bottom Pivot

## Finishes:

JIGTECH

TUBULAR LATCHES

Smart Latches

The full range of latches and bolts are supplied with a Jigtech spacer in attractive visual packaging. A comprehensive array of finishes are available in smart and rectangular forends, both mechanical and soft strike magnetic function can be specified. All latches are available in push button privacy function, for use with Jigtech privacy cover roses.

Suitable for passage doors, the fast fit Jigtech latch is supplied with both rectangular and round keeps for use on new or existing frames.

An ideal alternative to a bathroom lock, push button privacy is quick to install. Emergency unlocking through the external rose operating a concealed push button.

Introducing the Jigtech soft strike magnetic latch range. Featuring soft buffered closing and concealed dead bolts, magnetic latches are available in both passage and privacy.

Suitable for bathroom doors, the bathroom bolt series is used in conjunction with Jigtech fast fit bathroom turn and release sets. Supplied with a 5mm spindle.

Features and Benefits

All Jigtech latches are supplied with Jigtech spacers as standard in a high quality branded pouch bag with fitting instructions.

Every smart latch is supplied with both round and rectangular strike plates and tidies. Magnetic smart latches are supplied with buffered round and rectangular strike plates and tidies as standard.

Magnetic smart latches are also supplied with frame buffers and drill bits for soft close frame contact.

Push button privacy covers available - see the accessory section.

- Compatible with Jigtech passage and privacy latches
- Supplied as a pair
- Grub screw fix

Features and Benefits

Jigtech bathroom turn release sets and Jigtech Privacy are the fast fitting alternative to bathroom locks.

Bathroom turn and release sets feature the unique Jigtech sleeves for fast fitting and perfect alignment. Prepare the door with the Jigtech jig and then fit with a Jigtech bathroom dead bolt.

Privacy rose covers are used with Jigtech privacy latches. A cover pack and privacy latch is used to convert passage to privacy. Every passage set base rose is drilled to suit a privacy rose cover.
