

CRUNCHY SUPERFOOD SNACKS

THE WINE RAYZYN COMPANY CELEBRATES NATIONAL HEART HEALTH MONTH

NAPA VALLEY, Calif. (February 13, 2017) – February is Heart Health Month, and The Wine RayZyn Company is celebrating by implementing several online promotions to celebrate and share information about its heart-healthy products.

Wine RayZyns are a superfood that combines the unique flavor of the wine grape with the power-packed nutrients of wine grape seeds and skins. What sets these wine grapes apart is that they are harvested in California with the stems kept intact to serve as nature's cork. The stems lock in and preserve the fruit's inherently high nutritional content. The wine grape clusters then go through a patent-pending, special drying process that dehydrates the fruit. The resulting RayZyns are a nutrient-dense and fiber-rich snack food.

In addition to RayZyn's core brand (CabernayZyn, ChardonayZyn, and MerlayZyn) promotions to raise awareness about the relationship between healthy eating and heart health, the company's latest product, Dark Chocolate Covered CabernayZyns, offers plenty to celebrate as well during the month that hosts both National Dark Chocolate Day and Valentine's Day. Dark Chocolate Covered CabernayZyns are guilt free indulgence and are so much more original than a box of chocolates. The Dark Chocolate Covered CabernayZyns are good source of iron, are a natural product, and the chocolate used to coat the CabernayZyns is made from Fair Trade Certified and organic ingredients.

CRUNCHY SUPERFOOD SNACKS

All Wine RayZyn wine grapes are harvested in California. The company takes careful steps to provide only “nature” to their consumers. These snacks are all natural, naturally sweet, and contain no preservatives or artificial flavors. They are non-gmo, vegan, gluten free, and contain no alcohol.

About The Wine RayZyn Company

The Wine RayZyn Company creates crunchy superfood snacks made from dried wine grapes harvested in CA. The products are a perfect fit for today’s health conscious consumers who are snacking more frequently.
