<b><u>Power BI Data Analyst Associate</u></b> Exam PL-300	<b><u>Microsoft Power Platform Developer Associate</u></b> Exam PL-400	<b><u>Power Automate RPA Developer Associate</u></b> Exam PL-500	<b><u>Power Platform Solution Architect Expert</u></b> Exam PL-600
Data analysts help businesses to maximize the value of their data assets using Microsoft Power BI.	Microsoft Power Platform developers design, develop, secure, and troubleshoot Microsoft Power Platform solutions. They implement components of the solution that include application enhancements, custom user experience, system integrations, data conversions, custom process automation, and custom visualizations.	RPA Developers automate time-consuming and repetitive tasks by using Microsoft Power Automate. They review solution requirements, create process documentation, and design, develop, troubleshoot, and evaluate solutions. They work with business stakeholders to improve and automate business workflows. They collaborate with administrators to deploy solutions to production environments, and they support solutions.	Solution architects for Microsoft Power Platform lead successful implementations and focus on how solutions address the broader business and technical needs of organizations.
