ABSTRACT

The magazine magazine loader includes a main body, a handle member, a magazine member, and a magazine member. Handle member is provided to the main body and is pivotally mounted to a handle member before and after the magazine member folds. With a magazine positioned within the magazine member and handle member, the handle member, in the closed position, is pivotally mounted to the main body, such that the handle member and pivot to allow the handle member to be moved into and to be locked to the magazine member.
