

CYGNETT

Magmount 360

Magnetic Dash & Window Mount

SMALL AND MEDIUM ADHESIVE MOUNTING DISKS

Attach this to the outside of your phone*, phone case or other devices that do not have a case or a suitable flat surface - eg: GPS or textured or thick phone case. Before applying the adhesive mounting disk, clean the surface to ensure it is free of oil or dust.

LARGE RECTANGULAR MOUNTING PLATE

This larger metal plate does not require adhesive. Use with your smartphone case, simply place it between your phone and phone case. Please note: cases must have a flat back surface and they must be thinner than 1.8mm /0.3 inch, or the magnet will not form a strong hold.

WARNING

*The 3M adhesive used is a very strong adhesive. Please be aware that placing this directly on your phone may be very difficult to remove, or it may leave a mark.

Cygnett cannot be responsible for damage caused to your device.

Do not use a credit card carrying phone cases with the MagMount 360 or MagMount 360 Vent as the magnet may wipe your credit cards.
