ChargeUp Swift Wireless 10K
10,000 mAh Portable Powerbank

Recharge your ChargeUp Wireless
To recharge your ChargeUp Wireless, connect it to a computer, car-charger or wall-charger via the Micro-USB input (D), using the Micro-USB cable provided. When charging, the number on the LCD display (B) will begin to flash, indicating remaining charge.

Charge your compatible Qi Charging device wirelessly
To charge your device, place it over the wireless charging output (E), and press the power button (A) once. The LCD display (B) will show the remaining charge from 0 to 100. Some cases can interfere with Qi Charging if they are constructed out of metallic materials such as aluminum. Please note that when wireless charging is operating, less power will go to the USB ports so devices connected via a cable will charge slower.

Charge your device via USB
Using your device’s USB charging cable (not included), connect your device to one of the two USB outputs (C). Press the power button (A) once to start charging your device. Your device should indicate that it has begun to charge. The LCD display (B) will now indicate your ChargeUp Wireless’ remaining charge. A second device can be connected without needing to press the button. When you are finished charging your device(s), detach them from your ChargeUp Wireless. It will turn off automatically.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 and Part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and radiates radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: --- Reorient or relocate the receiving antenna, --- Increase the separation between the equipment and receiver, --- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected, --- Consult the dealer or an experienced radio/TV technician for help.

Harmful interference to radio communication services and other equipment may occur if the equipment is not installed in accordance with the instructions. To avoid harmful interference to radio communications, please consult your local authority and the relevant broadcasting authority where you live. The radio equipment type is provided below:

FCC ID: 2AEDZCYG2526
Operation frequency: 129.7-182.6kHz
H-field strength: 0.46dB

Please read and follow these instructions carefully and retain for your records.
Please read all warnings for your safety and optimal user experience.

1. Never leave a charging battery unattended.
2. Do not expose the Charging pad to excess heat or liquids. It should be stored in a cool, dry place when not in use.
3. To avoid damaging the casing of the ChargeUp Wireless, do not force any objects or devices into the area around the charging pad. This may cause over-feeding or damage to the charging pad.
4. Do not expose the ChargeUp Wireless to sources of heat, including radiators, stoves, or fire. Do not expose to ambient temperatures above 40°C, such as in a car on a hot day, or in direct sunlight. Failure to do so may cause over-heating, fire, or explosion.
5. Do not use in a strong electromagnetic environment, including near microwaves as this may disrupt the device’s operation.
6. If the device is exposed to liquid or does not operate normally, please do not attempt to service or open the device. This may cause over-feeding, fire or an explosion.
7. If the battery electrolyte comes in contact with skin or eyes, rinse thoroughly with water immediately and consult a doctor. The electrolyte is flammable and may cause the chemicals to ignite, in which case it is recommended to consult a doctor immediately.
8. If a new ChargeUp is not used for a period of three months or more, its battery capacity will be reduced, but will return to normal capacity after 2-4 charge and discharge cycles.
9. Do not use the product in a battery recycling station. It is not suitable for domestic waste disposal.

Please note that changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Product specifications:
- Total output: 15W
- USB Output 1: DC 5V–2.4A (MAX)
- USB Output 2: DC 5V–1A, 9V–1A (10W MAX)
- LCD display: 10,000 mAh
- Battery capacity: 10,000mAh
- Input: DC 5V – 2.0A (MAX)
- Battery type: Polymer battery

Please consult the manufacturer’s instructions and warnings for detailed usage and care instructions.

Important safety instructions:
- Never leave a charging battery unattended.
- Do not expose the Charging pad to excess heat or liquids. It should be stored in a cool, dry place when not in use.
- To avoid damaging the casing of the ChargeUp Wireless, do not force any objects or devices into the area around the charging pad. This may cause over-feeding or damage to the charging pad.
- Do not expose the ChargeUp Wireless to sources of heat, including radiators, stoves, or fire. Do not expose to ambient temperatures above 40°C, such as in a car on a hot day, or in direct sunlight. Failure to do so may cause over-heating, fire, or explosion.
- Do not use in a strong electromagnetic environment, including near microwaves as this may disrupt the device’s operation.
- If the device is exposed to liquid or does not operate normally, please do not attempt to service or open the device. This may cause over-feeding, fire or an explosion.
- If the battery electrolyte comes in contact with skin or eyes, rinse thoroughly with water immediately and consult a doctor. The electrolyte is flammable and may cause the chemicals to ignite, in which case it is recommended to consult a doctor immediately.
- Do not use the product in a battery recycling station. It is not suitable for domestic waste disposal.
