

Table of Contents

Section 1 - Building Information Modeling and the Construction Project

- 1.1 BIM on a Construction Project
- 1.2 Planning to Use BIM on a Construction Project
- 1.3 BIM Specifications on a Construction Project

Section 2 – Building Information Modeling for Business Development and Planning

- 2.1 BIM for Business Development
- 2.2 Introduction to Trimble SketchUp Make®
- 2.3 Creating a Simple Building Model
 - Basic Navigation
 - Basic Modeling
 - Integrating Image Files
- 2.4 Creating a Site Logistics Plan with SketchUp®

Section 3 – Building Information Modeling - Quantity Takeoff and Estimating

- 3.1 Introduction
- 3.2 Quantification Tool in Navisworks Manage® 2020
- 3.3 Material Takeoff from Revit® 2020
- 3.4 Takeoffs Using Conceptual Masses in Revit®
- 3.5 Optional Learning Opportunity: Estimator® for SketchUp
- 3.6 Optional Learning Opportunity: Bluebeam Revu®

Section 4 – Building Information Modeling and Project Coordination

- 4.1 Introduction
- 4.2 File types
- 4.3 Working with Files in Navisworks Manage® - Appending Files
- 4.4 Working with Files in Navisworks Manage® - Checking for Clashes
- 4.5 Working with Files in Navisworks Manage® – Clash Results
- 4.6 Working with Navisworks Manage® – Resolving Clashing Members
- 4.7 The Review Tab in Navisworks Manage®
- 4.8 Navisworks Manage® – Other Items in the Clash Detective
- 4.9 Navisworks Manage® – Reports in the Clash Detective

Section 5 – Building Information Modeling and the Construction Schedule

- 5.1 Introduction
- 5.2 Working with Files in Navisworks Manage® - Timeliner Tool
- 5.3 Navisworks Manage® – Creating Timeliner Using a Linked Schedule
- 5.4 Navisworks Manage® – Linking Phoenix Project Manager® Schedules to Timeliner
- 5.5 Navisworks Manage® – Linking Phoenix Primavera Suretrak® Schedules to Timeliner
- 5.6 Navisworks Manage® – Identifying Time-Based Clashes Using Timeliner
- 5.7 5D BIM Using Timeliner

Section 6 – Capstone Project

- 6.1 Introduction
