

Cabana Shade Set Up Guide

Set Contents

- 1 Cabana Shade
- 4 Ground Stakes
- 4 Sandbag Anchors
- 1 Carry Bag
- 4 Tent Poles

You're ready for a day in the sun! Start by setting up some shade.

1. Unfold the Cabana Shade and lay it out flat on the ground.
2. Place the front of the shade facing into the wind.
3. Fill the anchor sandbags completely. They will work better when fully filled.
4. Pull the anchors out at an angle. The shade material is very flexible so stretch the Cabana taut.
5. Assemble 2 tent poles, or 3 or 4 depending on the setup you plan to use. See Additional Tips!
6. Place the foam ball end of the pole under the shade at the front corners.
7. Stand the pole up while keeping the ball in place and plant the end of the pole firmly on the ground.
8. Sandbag anchors may slide while positioning poles. Ensure lines are taut, reposition the anchors if necessary.
9. If using 3 or 4 poles, repeat the procedure with the other 2 poles. Place the remaining poles at the rear of the Cabana 12-24 inches from sides and rear edges. Repeat steps 5-8.

Additional Tips:

- If you are having difficulty, the most likely solution is to stretch the material more. Fill the sandbags more and place them farther out.
- Wind can be good and bad. A light wind flowing in the front will lift the shade, creating more headspace. Stronger winds may cause instability.
- 2 poles may be more stable than 4 in stronger winds. Also, placing tent poles at a slight angle, with the top facing into the wind, may help with stability.
- 4 poles can allow for more shade, and works best in calm conditions.
- If wind causes anchor bags to slide, try burying the bags in holes covered with sand or using ground stakes.
- Tent poles can be adjusted for maximum stability. Some experimentation may be required.
- Try different configurations! Use 2 poles in diagonal corners for more shade when the sun is low. Use 2 poles centered front and back for a pup tent. Use 3 poles, 2 at front corners, 1 in the opposite side middle, for a tripod effect.
