

FOFANA NINJA CLIMBING LADDER

User Manual and Setup Guide

Set Contents

- 1 climbing ladder
- 1 carabiner
- 1 safety ring

Safety Guidelines

- For ages 6 and up.
- Adult supervision required.
- Weight limit 250 lbs.
- Adult assembly required, including site selection and installation.
- Do not attach to unhealthy trees, this may result in injury.
- Load stress test must be performed before use.
- All watchers should maintain a 10ft distance to prevent injury.

Installation with Safety Ring (no sewn in loops)

- If slackline obstacle course is already set up, loosen the line until there is no tension.
- Select desired position for climbing ladder. Shorter distances apart are recommended for smaller users (approximately 16 inches apart is a good place to start). First obstacle should be placed 6-10 feet from tree on the course line.
- With safety ring on underside of line, pull line through safety ring to make a loop. See Images 1 and 2.
- Thread carabiner through the line looped through the safety ring. Do not attach carabiner to safety ring. See Images 3 and 4.
- Attach climbing ladder to carabiner and lock carabiner gate closed with threaded locking nut.
- Use ratchet to fully tighten line following instructions from obstacle course or slackline.
- Perform load stress test.

Installation with Sewn Webbing Loops

- Select desired loop for climbing ladder.
- Thread carabiner directly through loop in webbing line, safety ring will not be used.
- Attach climbing ladder to carabiner and lock carabiner gate closed with threaded locking nut.
- Use ratchet to fully tighten line following instructions from obstacle course or slackline.
- Perform load stress test.

Mandatory load stress test

- Make sure all connections are tight.
- Bystanders should maintain a safe distance from the line, at least 10 feet.
- Using either a 250 lbs person or weight, test line by suspending weight 5 feet from each end.
- Watch for line dipping, or slipping around anchor trees. Tighten line as necessary.
- If anchor trees move or sway or bend, this is a sign they are not suitable.

Helpful Tips

- When line is loosened, carabiners may slide position. However, never use course unless line is fully tightened.
- If you are unsure about your health, please consult a health professional before use.
- There is possibility for injury or even death. Adult supervision is required.
