

BFMC10 Mountain Climber

Folds for storage

BFMC10 Mountain Climber

Shred fat and tone muscles in less time with the Best Fitness BFMC10 Mountain Climber.

The Best Fitness BFMC10 is a lower body stepper and upper body climber together in a single compact, affordable machine. Unlike most lower body only cardio machines, the Best Fitness Mountain Climber features a total body, vertical workout that activates, tones, strengthens and builds several major muscle groups like legs, shoulders, hips, glutes, abdominals and core. The Best Fitness BFMC10 burns more calories per workout than treadmills, ellipticals, bikes or other cardio lower body only machines.

The BFMC10 can be easily stored, folded and moved making it an ideal fit for space-restricted home workout spaces or garage gyms.

Weight: 49 lbs

Dimensions: 37" L x 19.7" W x 85.4" H

Special Features

- Total body cardio workout
- Target large muscle groups such as legs, shoulders, hips, glutes, abdominals and core
- Lower body stepper and upper body climber in one machine
- Easy to store
