

GSRM40 Seated Row Machine

Body-Solid[®]
Built for Life

Weight Plate post is 1" Diameter

GSRM40 **Seated Row Machine**

This is the tool of the trade for building depth in the middle back and training the hard to reach lower lats. Our uniquely designed GSRM40 Seated Row Machine is fully adjustable to fit all size users. The extra-thick DuraFirm seat and chest pads position you for maximum pre-stretch which is crucial for deep muscle penetration and full range-of-motion. Four-way handgrips widen or narrow to target resistance to the middle back resulting in accelerated muscle gains.

Olympic adapter sleeves optional

Weight: 88 lbs.
Dimensions: 54"L x 44"W x 39"H
