LVLP Leverage Horizontal Leg Press

The Body-Solid LVLP Leverage Horizontal Leg Press has a 2" x 3", 11-gauge steel mainframe, with an electrostatically applied metallic silver powder coat paint finish, sealed bearing pivot points and weight plate holders for storage. The LVLP Leverage Horizontal Leg Press features a direct drive press system for accurate and effective weight resistance, large pivoting footplate that maintains correct foot position throughout range of motion, and dual self aligning 1½" linear bearing seat carriage design that easily adjusts to accommodate various foot positions. The Leverage Horizontal Leg Press is constructed with the commercial facility in mind and features double-stitched upholstery with fully adjustable back support for proper body alignment and comfort.

Weight: 525 lbs.
Dimensions: 89"L x 57"W x 52"H
