

PSM144X Smith Machine

POWERLINE USA[®]
by Body-Solid

PSM144X Smith Machine

The Powerline PSM144X Smith Machine is a true powerhouse that is often imitated but never duplicated. It's a sophisticated combination of free weight power and resistance coupled with the safety and control of a machine. It uses four 2" x 2" 12 gauge steel pillars to support and guide the patented Super-Glide carriage during your most vigorous sets.

The Powerline PSM144X Smith Machine has a patented bushing system and super smooth sliding carriages will help you achieve rapid results in a controlled and safe environment that has been proven by customers like yourself for years.

Bar is 1" Diameter, for standard plates
