310 lb. stack (optional)

SLC400G2 Leg Curl

The Pro Clubline SLC400G Leg Curl has a uniquely engineered center-drive cam that distributes weight evenly to eliminate lateral torque. Biomechanically accurate pivot point ensures ergonomically correct body positioning for natural and complete Hamstring and Leg development. Elliptical cam keeps arc of movement smooth and provides variable resistance through full range-of-motion. Pop-pin adjustable foot pads assure proper alignment. All for a comfortable workout that is remarkably smooth and effective. Finally, a form-fitting machine that is big on strength, style and performance.

Weight: 434 lbs.
Dimensions: 64"L x 37"W x 62"H

Special Features

- 2" x 4" high-tensile strength steel
- Nylon-coated, self-lubricating, aircraft-quality steel cables
- Fiberglass reinforced nylon pulleys with v-grooved channels.
- Machine drilled weight plates with oversize nylon bushings
