VIQUA Validated Class B Systems

Models: VH200-V, VH410-V, VH410M-V

NOTICE

- This Class B system or component conforms to NSF/ANSI 55: Ultraviolet Microbiological Water Treatment Systems for the supplemental bactericidal
 treatment of disinfected public drinking water or other drinking water that has been tested and deemed acceptable for human consumption by the state or
 local health agency having jurisdiction. The system is only designed to reduce normally occurring non-pathogenic, nuisance microorganisms.
 Class B systems are not intended for treatment of contaminated water.
- · While testing was performed under standard laboratory conditions, actual performance may vary.

Water quality is extremely important for the optimum performance of your UV system. Consult your local authority for water chemistry accommodations in your area.
