

Eagle Lights 69200899 Splitter Harness for Dual Beam Harley Davidsons

Included Parts:

69200899

Warning!

For models WITH main fuse:

To prevent accidental vehicle start-up, which could cause death or serious injury, remove main fuse before proceeding.

For models WITHOUT main fuse:

To prevent accidental vehicle start-up, which could cause death or serious injury, disconnect negative (-) battery cable before proceeding.

Common Installation Errors

The 69200899 adapter wire is needed for all two plug connection Harley Davidson headlight systems. It is common on 2015 and up Road Kings and Street Glides. Please see below for common installation errors.

IMPORTANT! - Common Installation Error:

When connecting the headlight, you must make sure the black wire from the plug on the headlight is mated up to the black wire on the motorcycle's harness. If it is connected backwards, it will not illuminate. Flip the plug around to solve this. If you experience any issues, please contact our tech help line.

IMPORTANT - Common Installation Error:

Do NOT reverse the connection. The high beam connection should be labeled. The connection with the yellow wire is the low beam. The connection with the white wire is the high beam.
