

8900BG2-2SB

Installation

Instructions

Installation:

Steps may be different depending on the model. Please ensure you have read through the instructions and understand them clearly before attempting the installation.

WARNING!

- To prevent possible electrical shock, disconnect the negative battery terminal before installing this product.
- Park the bike on a level surface. Allow the bike to cool before starting installation.
- Remove the old headlight. Follow the harness from the back of the light until you find the single 3 pin connector. It is not the H13 connector, but a smaller 3 pin version. Sometimes the small connector is stuffed in the headlight bucket.
- After disconnecting the headlight, remove the assembly for the stock headlight. Remove and place to the side.
- Install the bracket on the bike at the same mounting location with the hardware.
- Install the new LED headlight onto the mourning bracket with the provided hardware.
- Using the provided harness, connect the headlight to the small three pin harness.
- Test the high and low beam functionality of the headlight.
