

# 8900BG3-VT13 Installation Instructions

## Product Overview:

The Eagle Lights 5 3/4" LED headlight is a replacement headlight designed for 2010-current Honda VT1300 models. This headlight features high-quality LED bulbs that produce a brighter and more focused beam of light than traditional halogen bulbs. The headlight is constructed with a rugged aluminum housing that is both durable and lightweight. The lens is made from polycarbonate material, which is highly resistant to impact, scratching, and weather damage.

## Installation Warning

If you feel uncomfortable installing this product, we recommend having a professional complete the installation. Eagle Lights LLC is not liable for any damage to the product or vehicle due to an improper installation. If you have questions about the installation, please feel free to call us at 1-800-921-3162 or email us at [Support@EagleLights.com](mailto:Support@EagleLights.com).

## Installation:

Below are steps for a typical installation on most models. Steps may be different depending on the model. Please ensure you have read through the instructions and understand them clearly before attempting the installation.

### WARNING!

- To prevent possible electrical shock, disconnect the negative battery terminal before installing this product. Park the bike on a level surface.

1. Remove OEM headlight.
2. Disconnect OEM headlight.
3. Remove the inner adjustment bracket.
4. Install the provided bracket on the back of the headlight.
5. Use bolts to install the headlight into the OEM trim ring.
6. Plug in the new headlight to the bike.
  - a. There is a separate wire for a position light. It is not needed on US model bikes and can be left unconnected.
7. Mount OEM trim ring with headlight installed back into the bike with the OEM hardware.
8. Test light functions.
