FTSR Installation Instructions

Installation:

Steps may be different depending on the model. Please ensure you have read through the instructions and understand them clearly before attempting the installation.

WARNING!
● To prevent possible electrical shock, disconnect the negative battery terminal before installing this product.

- Wiring the FTSR:

    - The installation is fairly simple on most models. Use the below color codes to connect the tail light to the wiring on your motorcycle.

        - Black - Ground

        - Red - Brake Light Positive

        - White - Running Light Positive

        - Yellow - Turn Signal Positive(Wire Side)

        - Green - Turn Signal Positive

    - Connect each wire to to the corresponding function on the motorcycle.

    - If your motorcycle's turn signals also function as brake light function, you will need to wire the turn signal wires (Green and Yellow) to the front turn signal positive wiring.

    - Use the included Eagle Tap wires to connect the wiring.

        - Unscrew the top portion and thread the wire through.

- Unscrew the other side and place it over the wire.

- Slowly screw on the tops to make the connection.
