IND-MX150-EL60WR Installation Instructions

Product Overview:

This LED Headlight Harness for Indian models offers a convenient solution to fixing issues when the high beam or low beam gets stuck on. Plug-and-play installation makes it easy to install and use with minimal effort and no additional tools.

Tools Required: None

Installation Warning

If you feel uncomfortable installing this product, we recommend having a professional complete the installation. Eagle Lights LLC is not liable for any damage to the product or vehicle due to an improper installation.

If you have questions about the installation, please feel free to call us at 1-800-921-3162 or email us at Support@EagleLights.com.

Installation:

Below are steps for a typical installation on most Indian motorcycle models. Steps may be different depending on the model and year of your motorcycle. Ensure you have read through the instructions and understand them clearly before attempting the installation.

⚠	WARNING!	⚠
	● To prevent possible electrical shock, disconnect the negative battery terminal before installing this product. ● Wear eye protection.	

1. Make sure the bike is on a level surface.
2. Use a protective covering for the front fender.
3. Remove the LED headlight and disconnect it from the bike.
4. Connect the harness to the headlight.
5. Connect the harness to the motorcycle
6. The load resistor (gold bar) will get hot during use. Fasten it away from other wiring on the bike.

7. Reconnect the negative battery terminal
8. Test the headlight high beam and low beam functions.
9. Reinstall the headlight.
