

# LPC01B Installation Instructions

## Product Overview:

Light up your Harley Davidson motorcycle with Eagle Lights' Curved LED License Plate Light. This easy-to-install product comes with all necessary hardware and is specifically designed for perfect fit with 12 degrees of curvature. Includes LEDs for plate light. Get superior nighttime visibility and remain safe and visible on the road.

## Installation Warning

If you feel uncomfortable installing this product, we recommend having a professional complete the installation. Eagle Lights LLC is not liable for any damage to the product or vehicle due to an improper installation. If you have questions about the installation, please feel free to call us at 1-800-921-3162 or email us at [Support@EagleLights.com](mailto:Support@EagleLights.com).

## Installation:

Below are steps for a typical installation on most Harley Davidson models. Steps may be different depending on the model. Please ensure you have read through the instructions and understand them clearly before attempting the installation.

 <b>WARNING!</b> 
<ul style="list-style-type: none"><li>• To prevent possible electrical shock, disconnect the negative battery terminal before installing this product. Park the bike on a level surface before performing modifications.</li></ul>

1. Locate the rear lighting harness under the bike. Trace the harness to the rear lights. Note the location of the wiring harness.
2. Undo the original license plate. Keep the stock hardware.
3. Connect the white wire to the running light positive on the rear lighting harness (typically blue on HD models).
4. Connect the black wire to the ground on the rear lighting harness (typically black on HD models).
5. Mount the plate light to the bike using the stock hardware. Note the location of the wires coming out of the plate. Ensure they are not squished during installation.
6. Reconnect the negative battery terminal.
7. Turn on bike, test light.
