 WARNING! 
<ul style="list-style-type: none">• To prevent possible electrical shock, disconnect the negative battery terminal before installing this product.

- The P335847 turn signals are a two wire LED turn signal. They do not have a running light, offering a clean look.
- To wire in the turn signals, locate the wiring for the turn signal on your Harley Davidson.

2

- Typically, the wiring colors on Harley Davidson models will be black, blue, brown (right side) or black, blue, purple (left side). Indian turn signal colors may vary.
 - For the right side:
 - Black connects to the black
 - Brown connects to the red
 - Blue gets capped off and is not used.
 -
 - For the left side:
 - Black connects to black
 - Purple connects to red
 - Blue gets capped off and is not used.
 - Indian
 - Black connects to the black.
 - Red connects to the hot for the turn signal. Sometimes it is gray or gray with a white stripe. It can also be red.
 - Repeat on opposite side of motorcycle.
- Test the turn signal functions.
- These lights themselves get mounted to the inside of the handle bar. Screw the grommet tighter to create a snug fit.
