## ACOUSTIC PET FELT BLOKS

SIMPLE, MODERN, VERSATILE + GOOF-PROOF INSTALLATION

LARGE INSTALLATION? NO PROBLEM. ADD'L KITS CAN BE ADDED TO EXPAND YOUR INSTALLATION

FLOOR STAND

OUTSIDE BANDS X2

DESIGN SQUARES X2

Each BLOK requires two Outside Bands and two Design Squares. One floor stand is included per four BLOKS (used for free standing installations). Three Outside Perimeter Finish Wraps are included per kit. Use these wraps to stabilize the BLOKS and provide a finish detail to the edges. Wraps are optional and not necessary for all installations (used primarily for freestanding installations).

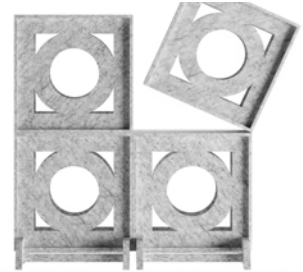

1) Assemble the first BLOK by inserting the tabs of the Design Squares into the notches of the Outside Band.

NEED A VIDEO? NO PROBLEM. SEE HARMONY BLOKS PAGE ONLINE AT INHABITLIVING.COM

2) Complete the first BLOK. If it's a bottom BLOK that will stand on the floor, attach the Floor Stand.

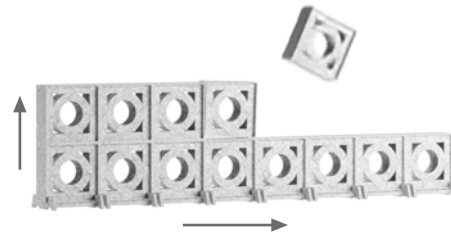

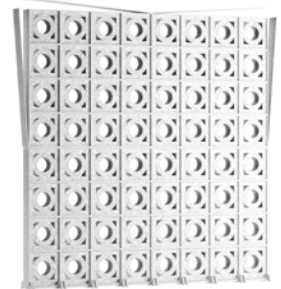

3) Continue to assemble BLOKS.

4) Use the provided connector bands to attach the BLOKS to each other. Bands will thread through the two access holes in each BLOK that you are attaching to one-another.

Note: For a larger installation or to speed up assembly we recommend using a cable tie gun.

5) Continue connecting the BLOKS to the desired width and height.

6) Once you have completed assembling and attaching all BLOKS, you can now add the optional outside perimeter finish wraps. You will only need these if your Blok installation is freestanding or if you have an exposed edge.

You can also use hot melt glue to attach them. For a semi-permanent installation use peel and stick Harmony Tape (sold separately).

Note: If you are creating a floor to ceiling installation or connecting to a side wall, we do recommend attaching the BLOKS to the wall or ceiling. You can use construction adhesive or for a semi-permanent installation use our peel and stick Harmony Tape (sold separately). This material will also accept wood screws for attaching to a wall or ceiling into a stud. For attaching to drywall with no stud support you must use a wall anchoring system. **Additional Floor Stands and permiter finish wraps are available on the website.**
