PPN35Ci Nails Features & Benefits:

Hardened Twist Nails

Reduced risk of misfiring nails due to increased quality resulting in improved safety.

1st Metal connectors strip nails range with an ETA

Developed for Structural UK applications, Hardened Twisted Nails have a European Technical Approval for metal connectors on wood. (Off-site & On-site application).

Paslode Nailing System

Nails, Fuel Cells and Tools are developed, produced and tested in Europe every day, providing optimum performance, the highest levels of safety and local technical support.

Successfully used in Solid Wood Beam

Thanks to their specific process, Hardened Twisted Nails nails have been used on various UK job sites in solid wood beams.

No Plastic Debris

Thanks to the paper collation, there is no plastic debris flying around when you are nailing, resulting in no clean up and better safety in use.

PPN35Ci Features & Benefits:

Fast Hole Locator Probe

Recognised as the easiest system for locating the pilot hole, saving you both time and money, resulting in a faster and better finish.

Hardened Twist Nails

Reduced risk of misfiring nails due to increased quality resulting in improved safety.

Start & Go®

Innovative movement sensor means no battery discharge when not in use. Up to 25% more shots per charge than other Lithium tools.

Fuel & Battery Gauge

Easy and fast control of your battery and fuel cell levels means you need never be caught without power on site, as the tool alerts you when down to your last 300 shots.

Quick Charge, Long Life Lithium Battery

Provides up to 7,500 shots per full charge (1 hour); 6,000 shots in just 30 minutes; 200 shots in just 2 minutes even on the move.

FAST HOLE LOCATOR
