# STELLARE

CECILIA "STELLARE" is the first glowing rosin made specially for young students that can add a lot of fun and motivation when they are getting ready to play the instrument.

The mini LED lights inside the rosin are activated by a motion sensor, and they blink when you open the lid and while you rosin the bow.

Teachers can be creative with this rosin to make the lessons and trainings more fun and productive for their young students.

STELLARE is specially blended to better accommodate non full size instruments for young students in novice and intermediate levels.
